\*\* Students should get a passing grade if they will clear at least two online aptitude tests and achieve minimum criteria of attendance.

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: V</b>			
<b>Course:</b>	<b>Emotional Intelligence (Audit Course - 2)</b>			<b>Code: BHM9963</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
01	-	-	01	-	-	-	-
<b>Course Objectives:</b>  1. To develop an awareness of Emotional Intelligence models. 2. To understand intelligence and develop emotional competence. 3. To understand how you use emotion to facilitate thought and behavior. 4. To know and utilize the difference between reaction and considered response.							
<b>Course Outcomes:</b>  After learning the course, students will be able to: 1. Understand how to manage emotions, behaviour and self-control in any situation resulting in better productivity 2. Employ emotional intelligence competencies to effectively interact with people, colleagues and employees in building stronger relationships at work and at home 3. Articulate emotions using the right verbal and non-verbal language 4. Use tools to regulate their emotions and recognize and respond appropriately to emotions in self and others.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction to Emotional Intelligence (EI)</b>  What is Emotional Intelligence, Emotional Intelligence and various EI models, The EQ competencies of self-regulation, motivation, empathy and interpersonal skills, Understand EQ and its importance in life.						<b>03</b>
<b>II</b>	<b>Self-awareness (SA):</b> Seeing the other side, giving in without giving up. <b>Tools:</b> Think, Feel, Act Cards, Plutchik’s Wheel of Emotions& Emotional intelligence test <b>Self-Regulation/Managing Emotions:</b> The science of Emotions, Self-emotional quotient						<b>03</b>
<b>III</b>	<b>Gaining Control:</b> Use of Coping Thoughts and Relaxation Techniques to manage emotions, <b>Activities:</b> Be the Fog, Temperament Analysis. <b>Emotion recognition in others:</b> The universality of emotional expression, perceiving emotions accurately in others to build empathy <b>Activities:</b> Mindful Listening, Perceptual Positions						<b>03</b>
<b>IV</b>	<b>Emotional Intelligence at Work place</b>  Importance of Emotional Intelligence at Work place, role of empathy and trust in relationships, building effective work relationships, conflict resolution strategy, Cohesive team building, <b>Tests:</b> My Colored Hat, —I AmI Circle, Empathy Cards.						<b>03</b>
	<b>Total</b>						<b>12</b>

<b>Course Objectives:</b> 1. To inspire students and help them imbibe an entrepreneurial and start-up mind-set 2. To develop and strengthen entrepreneurial quality among students. 3. To understand the abilities to become an entrepreneur. 4. To acquaint with legalities in product development, IPR, Trademarks, Copyright and patenting 5. To know the facets of Business plans, Entrepreneurial Finance							
<b>Course Outcomes:</b> After learning the course, the students will be able to: 1. Develop an entrepreneurial mind-set by learning key skills such as product design, salesmanship, marketing and interpersonal skills. 2. Interpret their own business plan and analyse factors that contributed to the failure of a start-up 3. understand how to determine the best source of capital for a company and how to find revenue and expense assumptions 4. Understand the legalities in product development, IPR, Trademarks, Copyright and patenting							
Detailed Syllabus							
Unit	Description						Duration (H)
I	Concept and Scope Entrepreneurship as a career, Traits of Successful Intrapreneur/ Entrepreneur, why to become entrepreneur, Entrepreneurship Development Phases, Problem Solving and Ideation Process, Design Validation, Types of Start-ups						03
II	Creating Entrepreneurial Venture Sources of Innovation, methods of generating ideas, Prototype preparation and validation, Legal Issue, Private/Public Limited Company formation requirements, Intellectual Property Protection: Patents Trademarks and Copyrights, <b>Entrepreneurial Failure:</b> Case study of patterns, Early failures: good idea bad planning, False start, False positive, Late-stage failures: Speed trap, Cascading miracle, False confidence						03
III	Business Plan Preparation Sources of product for business: Feasible study, Ownership, capital, budgeting, Marketing plan for the new venture, steps in preparing marketing plan, Business Model Canvas (BMC), Financial plan- proforma income statements, Ratio Analysis.						03
IV	Financial Modeling and Metrics Spreadsheets, Benchmarks, Revenue assumptions, expense assumptions, Metrics customer Acquisition cost and life time model, Metrics viral coefficient, Funnel Analysis, <b>Entrepreneurial Finance:</b> venture capital, financial institutions supporting entrepreneurs, Lease Financing; Funding opportunities for Start-ups in India, Crowdfunding, Angel investing						03
	Total						12

Course:	Research Article Writing (Audit Course - 2)			Code: BHM9965			
Teaching Scheme				Evaluation Scheme			
Lecture	Tutorial	Credit	Hours	IE	MTE	ETE	Total
01	-	-	01	-	-	-	-
<b>Course Objectives:</b>  1. To understand about how to write effective research article 2. To create awareness about grammar, lexical choices, citations in the text 3. To develop a full-length article, proposal or conference presentation 4. To familiarize the basic methods and techniques of research writing							
<b>Course Outcomes:</b>  After learning the course, students will be able to: 1. Understand necessary traits to write effective research article with appropriate grammatical and lexical choices in text 2. Comprehend the importance of citations, indexing, indexed articles and plagiarism. 3. Develop an ability of critical thinking necessary to analyse a research report. 4. Write a research article, review article, thesis chapter and other related academic research text effectively and demonstrate importance of revising and proofreading for writing research article.							
<b>Detailed Syllabus</b>							
Unit	Description						Duration (H)
I	Introduction to Research Writing  What is a research article? Understanding what is ‘Research Writing’, Qualities and skills required in a Research writer, Types of Research writing, choosing a suitable journal/conference/book chapter, how to conduct an effective Research, Abstract Writing, Selection of keywords, defining problem statement.						03
II	Sources of citations:  Understanding of giving citation to other works, identifying relevant citations, understanding impact factor, Importance of Indexing and Indexed articles, learning to scan research articles quickly and effortlessly, Using Your Sources Wisely: what to cite, where to find good sources and how to use them, avoiding plagiarism <b>Plagiarism tools:</b> iThenticate, Grammarly <b>Citation Tools:</b> Mendeley, BibMe, Citefast, APA, MLA						03
III	Drafting:  Structure of a basic research paper, stages of writing and research, learn to write the first draft, Understanding the components of an article: Abstract, Introduction, Preliminary concepts, proposed system, Experimental section, result analysis and discussion, Conclusion, Reference.						03

<b>IV</b>	<b>Revising and Editing:</b>  Importance of revision, Understanding the comments of reviewer, Point-to-Point address of reviewer comments, What/Whatnot to revise, Emphasis on Journal formats, Proper usage of Grammar and sentence formatting, Steps for submitting the revised manuscript/article	<b>03</b>
	<b>Total</b>	<b>12</b>

## **TY B Tech Semester - VI**

<b>Program:</b> B. Tech. (Computer Engineering)		<b>Semester:</b> VI					
<b>Course:</b> Operating Systems		<b>Code:</b> BCE6414					
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
03	-	03	03	20	30	50	100
<b>Prior knowledge of</b> Computer Organization, Data Structures and Algorithms Is essential							
<b>Course Objectives:</b> <ol style="list-style-type: none"> <li>1. To provide a grand tour of the major components of operating systems.</li> <li>2. To introduce the notion of a process, threads and CPU scheduling</li> <li>3. To explore inter process communication mechanisms, to introduce the critical-section problem and solutions which can be used to ensure the consistency of shared data.</li> <li>4. To develop a description of deadlocks and a number of different methods for handling deadlocks in a computer system.</li> <li>5. To explore various techniques of allocating memory to processes and explain the concepts of demand paging, page-replacement algorithms.</li> <li>6. To describe the details of implementing local file systems and directory structures</li> </ol>							
<b>Course Outcomes:</b> <p>After learning the course, the students should be able to:</p> <ol style="list-style-type: none"> <li>1. Comprehend the components and services of operating systems</li> <li>2. Compare various process scheduling algorithms for a given snapshot of the system.</li> <li>3. Analyze IPC mechanisms and solutions of process synchronization for critical section problems.</li> <li>4. Identify a deadlock for a given system snapshot.</li> <li>5. Analyze the performance of memory management algorithms for a given problem.</li> <li>6. Apply disk scheduling policies for a given I/O request sequence with file management concepts.</li> </ol>							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction to Operating Systems</b> Introduction to Operating systems, Evolution of OS, Types of OS, Operating system components, O.S. Services, system calls. <b>System programs:</b> compiler, linker, loader.						<b>08</b>
<b>II</b>	<b>Process Management:</b> Process Concept- Process states, Process control block, Threads- Introduction, Multithreading Models, POSIX / pthreads <b>Process Scheduling:</b> Basic Concepts ,Scheduling Criteria, Scheduling Algorithms.						<b>08</b>

<b>III</b>	<b>IPC and Process Synchronization:</b> Inter process Communication mechanisms: Pipes, Shared memory, Message passing <b>Process Synchronization :</b> Introduction, Critical-Section Problem, Hardware Support for Synchronization, <b>Mutex Locks, Semaphores</b> , Synchronization problem: Reader-writer, producer- consumer problem, Dining Philosophers problem.	<b>08</b>
<b>IV</b>	<b>Deadlocks:</b> Introduction, Methods for Handling Deadlocks, Deadlock Prevention, Deadlock Avoidance, Deadlock Detection, Recovery from Deadlock.	<b>08</b>
<b>V</b>	<b>Memory Management</b> Memory management: Introduction, Contiguous and non-contiguous, Swapping, Memory Allocation Strategies, Paging, Segmentation, Virtual Memory: Background, Demand paging, Page Replacement Policies, Thrashing.	<b>07</b>
<b>VI</b>	<b>I/O Management</b> File Management: Concept of Files and Directories, File-System Structure, File-System Implementation, Directory Implementation, File Allocation Methods, Free-Space Management. Disk Scheduling-Disk Scheduling policies like FIFO, SSTF, SCAN, C-SCAN. Case study: xv6 Operating System	<b>06</b>
<b>Total</b>		<b>45</b>

<b>Program:</b>		<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>		
<b>Course:</b>		<b>Operating Systems Laboratory</b>			<b>Code: BCE6415</b>		
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Practical</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>TW</b>	<b>OR</b>	<b>PR</b>	<b>Total</b>
04	-	02	04	25	-	25	50
<b>Prior knowledge of</b> Theory of Computation, Data Structures and Algorithms Is essential							
<b>Course Objectives:</b> 1. To learn and understand data structures used in design of operating systems. 2. To understand functions of operating system. 3. To learn and understand process, resource and memory management.							
<b>Course Outcomes:</b>  After learning the course, the students will be able to: 1. Use the system calls related to process management for Linux commands 2. Implement process scheduling algorithms 3. Develop the solutions for synchronization problems 4. Implement memory management algorithms. 5. Simulate the deadlock management technique for deadlock avoidance. 6. Implement Disk scheduling algorithms for I/O management							
<b>Guidelines for Students:</b>  1. The laboratory assignments are to be submitted by students in the form of a journal. Journal consists of Certificate, Index, and handwritten write-up of each assignment. Each assignment write-up should have Title, Objectives, Theory- Concept in brief, Algorithm/Flowchart, Test cases, Conclusion. 2. Program codes with sample output of all assignments are to be submitted in softcopy.							
<b>Guidelines for Laboratory /Term Work Assessment:</b>  1. Continuous assessment of laboratory work should be based on overall performance of Laboratory assignments by a student. 2. Each Laboratory assignment assessment will assign grade/marks based on parameters, such as timely completion, performance, innovation, efficient codes, punctuality ect.							
<b>Guidelines for Practical Examination:</b>  1. Problem statements must be decided jointly by the internal examiner and external examiner. 2. Relevant questions may be asked at the time of evaluation to test the student’s understanding of the fundamentals, effective and efficient implementation. This will encourage, transparent evaluation and fair approach, and hence will not create any uncertainty or doubt in the minds of the students.							
<b>Guidelines for Laboratory Conduction</b>  1. Set of suggested assignments are provided for reference. Lab instructors may design the assignments with variations or suitable updations if required. 2. Operating System recommended: 64-bit Open-source Linux or its derivative. 3. Programming tools recommended: Open-Source/C/C++/JAVA.							

Suggested List of Assignments	
Assignment No.	Assignment Title
1	Write a program to simulate use of Linux commands like cp, grep with the usage of fork() and exec() system calls. Also show the usage of wait(), getpid() and exit() system calls.
2	Write a program to implement scheduling algorithms – FCFS, SJF, Round Robin and Priority
3	Write a program to simulate inter process communication mechanism using pipes and redirection.
4	Write a program using pthreads to demonstrate the reader writer synchronization problem. Implement appropriate synchronization. Show the different results with and without synchronization
5	Write a program to implement Banker's Algorithm for deadlock avoidance.
6	Write a program to simulate memory allocation techniques: First Fit, Best Fit, Next Fit and Worst Fit.
7	Write a to implement paging replacement algorithms : a) FCFS b) Least Recently Used (LRU) c) Optimal algorithm
8	Write a program to implement disk scheduling algorithms FIFO, SSTF, SCAN, C-SCAN
<b>Text Books:</b> <ol style="list-style-type: none"> <li>1. Silberschatz, Galvin, Gagne, "Operating System Principles", 10th Edition- 2018, Wiley, ISBN 978-1-118- 063330</li> <li>2. Stallings W., "Operating Systems", 9th Edition-2018, pearson, ISBN-13: 978-013-467-0959.</li> </ol>

04	-	02	04	25	-	25	50
<b>Prior knowledge of</b> Computer Networks, Database Management Systems Is essential							
<b>Course Objectives:</b>  1. To understand the methodologies of web applications development process. 2. To apply client and server-side technologies 3. To develop current client side and server-side frameworks. 4. To use current tools used for web application developments.							
<b>Course Outcomes:</b>  After learning the course, the students will be able to: 1. Construct UI interface for web applications. 2. Apply client-side scripting for web applications. 3. Demonstrate dynamic web-based application using server-side programming. 4. Demonstrate web applications using web frameworks.							
<b>Guidelines for Students:</b>  1. The laboratory assignments are to be submitted by students in the form of a journal. 2. Journal consists of prologue, certificate, table of contents and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Software & Hardware requirements, Date of Completion, Assessment grade/marks and assessor's sign, Theory- Concept, Conclusion/Analysis).							
<b>Guidelines for Laboratory /TW Assessment</b>  1. Continuous assessment of laboratory work is done based on overall performance and Laboratory performance of students. 2. Each Laboratory assignment assessment should assign grade/marks based on parameters with appropriate weightage. 3. Suggested parameters for overall assessment as well as each Laboratory assignment assessment include- timely completion, performance, innovation, efficiency, punctuality, and neatness.							
<b>Guidelines for Laboratory Conduction</b>  1. All assignments are compulsory. 2. Students are expected to work in groups of 3 to 4 for mini project.							

Suggested List of Assignments	
Assignment No.	Assignment Title
1	Construct a suitable static web application using HTML and CSS and Bootstrap. Use and configuration of Web Server. (Apache Tomcat)
2	Perform the user data validations. (Name, Password, Phone, Email, Address etc.) using JavaScript/JQuery.
3	Write a XML schema to describe and validate the XML data.
4	Demonstrate the use of arrays by creating a PHP web page e.g. Create an indexed array of 20 elements (e.g. employee_name) and search whether a given name exists in the array.
5	Create a webpage using PHP to demonstrate the Inheritance concept such as: to create a Class shape and its subclass triangle, square and circle and display area of the selected shape.( use the concept of Inheritance) Display menu( use radio button) a) Triangle b) Square c) Circle
6	Design Employee Registration form and store and retrieve the data using PHP and MySQL.
7	Implement the login and logout web application to handle the session management using session and cookies. (PHP)
8	Install Ruby Environment Setup and Write a Ruby program which accept the user's first and last name and print them in reverse order with a space between them.
9	Write a Ruby Script to send an Email to a specific User.
10	Design and develop mini project based on real life problems which comprises any one stack from above.

<b>Program:</b>		<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>		
<b>Course:</b>		<b>Technical Seminar - 2</b>			<b>Code: BCE6417</b>		
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Practical</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>TW</b>	<b>PR</b>	<b>OR</b>	<b>Total</b>
02	-	01	02	25	-	-	25
<b>Course Objectives:</b>  1. To apply the knowledge and skills for understanding realistic problem. 2. To review of literature for project work from appropriate sources such as books, manuals, research journals and from other sources, and in turn increase analytical skills. 3. To emphasizes learning activities that are long-term, Collaborative learning, interdisciplinary. 4. To provide every student the opportunity to get involved either individually or as a group so as to develop team skills and learn professionalism.							
<b>Course Outcomes:</b>  After learning the course, the students will be able to: 1. Identify and define the real life engineering problem from societal need point of view. 2. Develop critical thinking and problem solving ability by exploring and proposing solutions to realistic/social problem from technical perspective. 3. Choose and compare alternative approaches with the help of literature survey to select most feasible one. 4. Demonstrate Collaborative learning, Interpersonal Skills, Meta cognitive skills through different seminar activities. 5. Prepare good quality technical reports based on the selected problem statement. 6. Test and evaluate the model results to develop a probable solution.							
<b>Guidelines for Students:</b>  1. Seminar is one of the significant contributory team works that has to be completed based on the required number of credits as per academic regulations. 2. It is necessary to explore the domain of interest / research/ thrust area/ society needs. 3. <b>Seminar teams:</b> 3-4 students can form a team within the same or different discipline and their area of interest is to be registered with seminar Coordinator. 4. Finalization of Problem statement for implementation as project statement and base model implementation. 5. <b>Selection of Seminar Topic:</b> a. Student shall identify the area or topics in recent trends and developments in consultation with seminar guide or industry or any research organization. 6. <b>Guide Allotment:</b> a. Considering registered teams' area of interest/domain and expertise of guide, the Seminar coordinator in consultation with <b>panel of experts</b> allots Seminar guides. b. Guide should be allotted from the <b>same program</b> . c. <b>In case of interdisciplinary Seminar</b> , along with the guide from same program, co-guide should be allotted from the other program 7. Teams in consultation with guide will prepare Seminar <b>Synopsis</b> .							

**8. Seminar Review:**

- a. The Seminar coordinator with the Head of the department shall constitute a review committee comprising of domain experts and senior faculty members.
  - b. The review committee will approve the Seminar group and title. Discussion / presentation may be arranged covering topics listed in the synopsis.
  - c. The seminar Review committee will evaluate the timely progress of the projects.
  - d. Student with group members is expected to appear for minimum three reviews as per the seminar calendar.
  - e. Attendance for all 3 reviews is mandatory.
9. Student will be evaluated thrice in the semester based on seminar evaluation guidelines/Rubrics as follows:

Sr. No.	Review	Rubrics (Each carry 5 Marks)
1	Review-1 (10 Marks)	<ol style="list-style-type: none"> <li>1. Novelty, Innovation and Relevance of the topic - Societal relevance, possible topic leading to patenting / multidisciplinary</li> <li>2. Scope, Feasibility, and objectives for the topic</li> </ol>
2	Review-2 (20 Marks)	<ol style="list-style-type: none"> <li>1. Design of System Architecture</li> <li>2. Status of base model implementation (50% expected) followed by model testing and evaluation.</li> <li>3. Presentation Skills</li> <li>4. Regularity &amp; Team work</li> </ol>
3	Review-3 (20 Marks)	<ol style="list-style-type: none"> <li>1. Status of base model implementation (100% expected) followed by model testing and evaluation.</li> <li>2. Documentation and Originality of the content</li> <li>3. Paper publication/I PR/Participation in various contests/ Awards / Consultancy/ sponsored project</li> <li>4. Technical Knowledge</li> </ol>
<b>Total- (50 Marks)</b>		<b>Scaled down to (25 marks)</b>

**10. Report:**

- a. Report should be prepared as per the template provided by the department.
- b. Seminar reports shall be submitted in softcopy form/ (Hard bound reports could be avoided).
- c. In case of Interdisciplinary Seminar, students must submit **Completion certificate with signature of Co-Guide from another department.**

**11. Technical Seminar 2 Outcomes:**

- a. Student seminar team shall divide topic into sub topic and individually work on sub topic and perform literature survey.

- b. Finalization of Problem statement for implementation as project statement and base model implementation

**Seminar Work syllabus guidelines:**

- The student is expected to complete the Seminar2 work which will consist of selection of Domain Selection, Topic Identification, Finalization of sub topics for each student in group literature review, Problem Statement finalization, Base model implementation.
- The student shall prepare and submit the report of Seminar work in standard format for satisfactory completion of the work that is duly certified by the concerned guide (Internal External (in case of sponsored project)/ Co-Guide (in case of interdisciplinary project)) and head of the Department/Institute.

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>			
<b>Course:</b>	<b>Machine Learning (PEC-3)</b>			<b>Code: BCE6508</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
02	-	02	02	20	30	50	100
<b>Prior knowledge of</b> Database Management Systems, Data Mining, and Engineering Mathematic Is essential.							
<b>Course Objectives:</b>  1. To introduce different machine learning primitives. 2. To introduce different feature selection techniques to prepare training and testing data set 3. To solve regression problems using regression techniques. 4. To develop skills to understand nature of the problem and apply machine learning algorithm 5. To develop classifier model using classification algorithms 6. To interpret the model results and analyze the accuracy of the model.							
<b>Course Outcomes:</b>  After learning the course, Students will be able to: 1. Use different data preprocessing techniques to prepare training and testing data set. 2. Solve real world problems using regression algorithms and improve the model performance 3. Apply classification and clustering algorithms to solve real world problems. 4. Evaluate the performance of the model using different performance metrics.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction to Machine learning</b>  Introduction to Machine learning, Machine Learning approaches- Supervised Learning, Unsupervised Learning and Reinforcement Learning, Important Elements of Machine Learning- Data formats, Underfitting and Overfitting, Creating training and testing datasets, Feature Selection and Filtering, Principal Component Analysis (PCA)						<b>06</b>
<b>II</b>	<b>Linear Regression</b> <b>Linear regression-</b> Linear models, A bi-dimensional example, Linear Regression and higher dimensionality, Ridge, Lasso and ElasticNet, Robust regression with random sample consensus, Stochastic gradient descent algorithms, Finding the optimal hyper- parameters through grid search, Basics of polynomial regression.						<b>08</b>
<b>III</b>	<b>Supervised and Un Supervised Learning</b>  <b>Logistic regression-</b> Linear classification, Logistic regression, <b>Decision Trees-</b> Impurity measures, Decision Tree Classification, Random Forest, <b>Ensemble Learning:</b> Bagging, Boosting. <b>Clustering -</b> K-means, finding optimal number of clusters using Elbow method						<b>08</b>
<b>IV</b>	<b>Classification and Performance Metrics</b>  <b>Naïve BayesClassifiers:</b> Bernoulli Naïve Bayes, Multinomial Naïve Bayes, and Gaussian Naïve Bayes. <b>K Nearest Neighbor</b> Classifier, Distance-Weighted						<b>08</b>

	KNN. <b>Metrics</b> for Evaluating Classifier Performance, Confusion Matrix, Evaluating the Accuracy of a Classifier: Holdout Method and Cross-Validation, ROC Curve	
	<b>Total</b>	<b>30</b>

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>			
<b>Course:</b>	<b>Fundamentals of Blockchain (PEC - 3)</b>			<b>Code: BCE6509</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
02	-	02	02	20	30	50	100
<b>Prior knowledge of</b> Basics of Cryptography and Information Security Is essential							
<b>Course Objectives:</b>  1. To explain basic components of a Blockchain, its operations, underlying algorithms, and essentials of trust 2. To provide the fundamental cryptographic base for Blockchain. 3. To make students familiar with the working of Smart Contracts 4. To provide a detailed understanding of workings of a blockchain, its transactions, blocks and mining.							
<b>Course Outcomes:</b>  After learning the course, Students will be able to: 1. Comprehend the fundamental characteristics of Blockchain. 2. Apply the basic cryptographic primitives essential for Blockchain. 3. Compare the private and public Blockchain. 4. Analyze the working of Smart Contracts for verification or execution of agreement. 5. Apply appropriate distributed consensus algorithms for the real life problem.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction to Blockchain</b> Introduction to decentralized system, History, Conceptualization, Architectural principles behind Blockchain, Characteristics of Blockchain. Mining strategy.						<b>06</b>
<b>II</b>	<b>Basic Crypto Primitives</b> Hashing, public key cryptosystems, <b>Types of Blockchains:</b> private vs public Blockchain, Blockchain protocol and use cases, Hash puzzles.						<b>08</b>
<b>III</b>	<b>Distributed Consensus</b> Consensus approach, Consensus elements <b>Consensus Algorithms:</b> Proof of Work, Byzantine General problem, Proof of Stake, Proof of Elapsed Time, Proof of Activity, Proof of Burn.						<b>08</b>
<b>IV</b>	<b>Smart Contracts and Ethereum</b> History, Purpose and types of smart contracts, Introduction to Ethereum, bitcoin vs Ethereum stack. P2P network in Ethereum, consensus in Ethereum, scripts in Ethereum. Developing and executing smart contracts in Ethereum. State and data structure in Ethereum.						<b>08</b>
	<b>Total</b>						<b>30</b>

<b>Prior knowledge of</b> SQL, Basics of Web Technologies Is essential							
<b>Course Objectives:</b> 1. To familiarize with the core concepts of frontend and backend programming. 2. To explore the latest web development technologies. 3. To get acquainted with NOSQL databases.							
<b>Course Outcomes:</b> After learning the course, Students will be able to: 1. Articulate the latest technological stack for web application development. 2. Apply concepts of Angular JS for web applications development. 3. Explore the concepts of Node.js and Express for web applications development. 4. Explore the features of NOSQL databases for designing data models.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction to ANGULAR JS</b> Introduction, Features, Angular JS, Model-View-Controller, Expression, Directives and Controllers, AngularJS Modules, Arrays, Working with ng-model, Working with Forms, Form Validation, Error Handling with Forms, Nested Forms with ng-Form, Other Form Controls.						<b>06</b>
<b>II</b>	<b>Directives &amp; Building Databases</b> Filters, Using Filters in Controllers and Services, AngularJS Services, Internal AngularJS Services, Custom AngularJS Services, Directives, Alternatives to Custom Directives, Understanding the Basic Options, Interacting with Server, HTTP Services, Building Database <b>Case Study:</b> App Development Using AngularJS						<b>08</b>
<b>III</b>	<b>Node JS and Express Framework</b> Introduction, Terminals, Editors, Building a Web server with Node, HTTP Module, Views and Layouts, Middleware, Routing, Form Handling with Express, Request and Response Objects, Handle Bars, Comments and Blocks. <b>Case Study:</b> App Development Using Node and ExpressJS						<b>08</b>
<b>IV</b>	<b>MongoDB</b> JSON and MongoDB, adopting a Non-relational Approach, Opting for Performance vs. Features, Running the Database Anywhere, Generating or Creating a Key, Using Keys and Values, Implementing Collections.						<b>08</b>
	<b>Total</b>						<b>30</b>

<b>Prior knowledge of</b> Matrix Operations and Binarization Is essential							
<b>Course Objectives:</b>  The course is aiming to impart conceptual clarity among students about. 1. Application of point processing methods on digital image. 2. Application of spatial domain methods on digital image. 3. Application of image compression methods like RLE/Huffman coding and orthogonal transforms on digital image 4. Comprehension of the video processing basics.							
<b>Course Outcomes:</b>  After learning the course, Students will be able to: 1. Apply point processing methods on digital image. 2. Apply spatial domain methods on digital image. 3. Apply the image compression methods like RLE/Huffman coding and orthogonal transforms on digital image 4. Comprehend the video processing basics.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Fundamentals of Image Processing</b>  Basic steps of Image Processing System, Applications of Image Processing, Digital Image Acquisition: Sampling and Quantization, Basic relationship between pixels, Spatial domain image processing methods: point processing techniques: Image negation, Thresholding, gray level slicing, bit plane slicing, darkening and lightning of image.						<b>08</b>
<b>II</b>	<b>Spatial Domain Image Enhancement Techniques</b>  Histogram processing: Image Histogram and Histogram Equalization, Mask processing methods, smoothing spatial filters (Low pass filter), Sharpening spatial filters (High pass filters), High boost filter, Gradient filters: Prewit, Sobel and Robert.						<b>07</b>

<b>III</b>	<b>Fundamentals of Image Compression</b> Types of redundancies: coding, spatial, temporal, Compression models: Lossy & Lossless, Lossless compression: Run length encoding (RLE) and Huffman coding, Lossy compression: Introduction to JPEG., Introduction to orthogonal transforms: Haar transform, cosine transform, significance of transforms, applying transform on image, inverse of transformed image.	<b>08</b>
<b>IV</b>	<b>Basic Steps of Video Processing</b> Introduction to Digital Video, Video frames: normal-key frames, concept of shots and scenes Time-Varying Image, Extraction of visual and audio parts from digital video, applying point and mask processing methods on video frames: Introduction to MPEG	<b>07</b>
	<b>Total</b>	<b>30</b>

<b>Prior knowledge of</b> Basic concepts of Computer Networks, Protocols stack in Computer Network, limitations of Computer Network Is essential							
<b>Course Objectives:</b>  After completion of the course, students will have adequate background, conceptual clarity and knowledge of mathematic all principles related to: 1. To understand fundamentals of IoT including its reference architecture 2. To comprehend sensors, types of sensors and development boards 3. To provide detailed understanding of workings of various IoT protocols 4. To design and develop IoT systems for real time applications							
<b>Course Outcomes:</b>  After learning the course, the students will be able to: 1. Comprehend fundamentals IoT building blocks and its enabling technologies 2. Analyze the challenges in IoT systems 3. Comprehend various development boards like Arduino and Raspberry-pi 4. Select appropriate sensors and development board for stated IoT problem 5. Implement interfacing of various sensors and actuators to the development boards 6. Use various IoT protocols for designing real time applications							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction to IoT</b>  Definition and characteristics of IoT, Technical building blocks of IoT, Physical design of IoT, Communication technologies, IoT enabling technologies (WSN, Cloud Computing, Big Data Analytics, RFID, NFC), IoT communication models, IoT communication APIs (Representational State Transfer (REST) API, Web Socket Based Communication APIs), IoT issues and challenges, IoT reference architecture, IoT applications.						<b>06</b>
<b>II</b>	<b>IoT Hardware</b>  <b>Sensors:</b> Roles of sensors & actuators, Types of sensors, Active and passive, analog and digital, Contact and no-contact, Absolute and relative Working of Sensors: position, occupancy and motion, velocity and acceleration, force, pressure, flow, Acoustic, Humidity, light, radiation, temperature, chemical, biosensor, camera. <b>Development Boards:</b> Types of boards - Arduino, Raspberry-pi, Interfacing of sensors with development boards.						<b>08</b>
<b>III</b>	<b>IoT Protocols</b>  <b>PHY/MAC Layer:</b> Wireless HART, ZWave, Bluetooth Low Energy (BLE) Network Layer:6LoWPAN, RPL, COAP <b>Transport Layer and Application Layer:</b> CARP, XMPP, AMQP, MQTT						<b>08</b>

<b>IV</b>	<b>IoT Applications</b> Industrial IoT, IoT for smart cities, IoT in agriculture, IoT in Home automation, IoT in healthcare, IoT in remote monitoring.	<b>08</b>

<b>Prior knowledge of</b> Software Engineering Is essential							
<b>Course Objectives:</b>  After completion of the course, students will have adequate background, conceptual clarity and knowledge of mathematical principles related to: 1. Understand basics of software project management and its significance 2. Learn software project planning using CPM and PERT 3. Know resource scheduling in software project life cycle 4. Learn project cost estimation in software project life cycle 5. Learn project risk identification and mitigation in software project life cycle 6. Understand contemporary software project management concepts							
<b>Course Outcomes:</b>  After learning the course, Students will be able to: 1. Comprehend software project management concepts, viewpoints and significance 2. Prepare and analyze software project plans using CPM and PERT 3. Prepare and analyze resource scheduling in software project lifecycle. 4. Estimate the project cost in software project life cycle 5. Identify and mitigate project risk in software project life cycle 6. Comprehend contemporary software project management concepts							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction</b>  What is a project, Project Management: the need, Systems approach to management, Project goal and project management benefits, The Person, the team, the methodology functions and viewpoints of management, Project viewpoint versus traditional management, evolution of project management, where is project management appropriate? Management by Project: A common approach, Different forms of project management: industrial, service and government.						<b>06</b>
<b>II</b>	<b>Advanced Project Network Analyses and Scheduling</b>  Work Breakdown Structure (WBS), Project activities, Predecessor and successor activities, Network diagrams: (Activity on Arrow) AOA &(Activity on Node) AON, Do’s and don’ts of drawing network diagrams, Project plan, Project schedule, Critical Path Method (CPM) and Time–Cost tradeoff, Variability of activity duration, Program Evaluation and Review Technique (PERT), Theory of Constraints (TOC) and Critical chain method, Introduction to Graphical Evaluation and Review Technique(GERT).						<b>08</b>

III	<p><b>Resource Scheduling, Cost Estimation and Budgeting:</b></p> <p><b>Resource Scheduling:</b> Allocating resources and multiple project scheduling, TOC method for allocating resources to multiple projects, Resource loading and leveling using CPM, Resource rescheduling in CPM</p> <p><b>Cost Estimating and Budgeting:</b> Cost estimating, Cost escalation, System life cycle costs, Cost estimating process, Elements of budgets and estimates, Project cost accounting systems, Budgeting using control accounts.</p>	08
IV	<p><b>Risk, Contemporary and International Project Management:</b></p> <p><b>Project Risk Management:</b> Risk concepts, Risk identification, Risk assessment, Risk response planning, Risk tracking and response, Risk Mitigation, Monitoring and Management Plan(RMMM).</p> <p><b>Contemporary Software Project Management:</b> Project Management Information Systems (PMIS), Web-enabled project management, Significance of informal communication, Project terminating and closeout.</p> <p><b>International Project Management:</b> Problems managing international projects, Introduction to Capability Maturity Model (CMM) and People Capability Maturity Model (PCMM).</p>	08

<b>Course Name</b>		<b>Group A</b>			<b>Group B</b>		
	<b>Part I</b>	Machine Learning		<b>Part IV</b>	Image & Video Processing		
	<b>Part II</b>	Fundamental of Blockchain		<b>Part V</b>	Internet of Things		
	<b>Part III</b>	Full Stack Development		<b>Part VI</b>	Software Project Management		
<b>Course Objectives:</b>  1. To make the students aware about the fundamentals of the Programme /Professional Elective Course. 2. To develop skills for implementing various tools and technologies used for Professional Electives. 3. To make the students learn about the teamwork and to analyze the result of their teamwork in the form of project/application.							
<b>Course Outcomes:</b>  After learning the course, the students will be able to: 1. Analyze the fundamentals of Professional Electives. 2. Assess various tools and techniques available for Professional Electives. 3. Design/develop an application using functionalities of Professional Electives in a team.							
<b>Group A</b>							
<b>Part I: Machine Learning</b>							
<b>Guidelines for Students:</b>  1. The laboratory assignments are to be submitted by students in the form of a journal. 2. Each assignment write-up should have Title, Objectives, Outcomes, Theory- Concept in brief, dataset used, data description, conclusion, and assessor's sign. 3. Program codes with sample output of all performed assignments should be submitted.							
<b>Guidelines for Laboratory/Term Work Assessment:</b>  1. Continuous assessment of laboratory work is done based on the overall performance and laboratory performance of the students. 2. Each laboratory assignment assessment should assign grade/marks based on parameters with appropriate weightage. 3. Suggested parameters for overall assessment as well as each laboratory assignment assessment include- timely completion and submission, performance, innovation, efficiency, punctuality, neatness and soundness of the contents.							

**Guidelines for Laboratory Conduction**

1. Recommended Tools for the implementation of above assignments: Python, R, Jupyter Notebook etc. Use of the Anaconda platform is encouraged.
2. For mini project, select a real-world application in the group of 3-4 students and formulate a problem statement for application to be developed.
3. Student groups are required to continue same problem statement throughout all the assignments in order to design and develop an application as a part of mini project. Further assignments will be useful for students to develop an application.

Student groups are required to continue same problem statement throughout all the assignments in order to design and develop an application as a part of mini project. Further assignments will be useful for students to develop an application.

**Suggested list of Assignments**

Assignment No.	Assignment Title																		
1	<b>Feature Selection</b> Select any data set with high dimensions (such as Boston dataset, breast cancer dataset) from any repository of data such as SK-Learn, UCI library, Kaggle dataset library etc. Write a program to perform the following operations on the selected dataset and display the result. <ol style="list-style-type: none"> <li>Reduce dimensions using SelectKBest method</li> <li>Reduce dimensions using SelectPercentile method</li> <li>Reduce dimensions using PCA techniques</li> </ol>																		
2	<b>Linear and Polynomial Regression</b> <ol style="list-style-type: none"> <li>The following table shows the results of a recently conducted study on the correlation of the number of hours spent driving with the risk of developing acute backache. Write a program to find the equation of the best fit line for this data using linear and polynomial regression. Evaluate and compare the performance of both the models.               <table border="1"> <thead> <tr> <th>No. of hours spent for of driving (X)</th><th>Risk Score on a scale 0-100 (Y)</th></tr> </thead> <tbody> <tr><td>10</td><td>95</td></tr> <tr><td>9</td><td>80</td></tr> <tr><td>2</td><td>10</td></tr> <tr><td>15</td><td>50</td></tr> <tr><td>10</td><td>45</td></tr> <tr><td>16</td><td>98</td></tr> <tr><td>11</td><td>38</td></tr> <tr><td>16</td><td>93</td></tr> </tbody> </table> </li> <li>Select any data set with high dimensions (such as Diabetes dataset) from any repository of data such as SK-Learn, UCI library, Kaggle dataset library etc. Implement Linear Regression, Ridge, Lasso and ElasticNet models. Evaluate and compare the performance of these models.</li> </ol>	No. of hours spent for of driving (X)	Risk Score on a scale 0-100 (Y)	10	95	9	80	2	10	15	50	10	45	16	98	11	38	16	93
No. of hours spent for of driving (X)	Risk Score on a scale 0-100 (Y)																		
10	95																		
9	80																		
2	10																		
15	50																		
10	45																		
16	98																		
11	38																		
16	93																		

3	<p><b>KNN Classification</b></p> <p>A dataset collected from hospital showing details of medical test reports with symptom values observed in the patient's and medical test either positive or negative. Write a program to build k-NN classifier models. If k=3, find the class of the point (6, 6). Extend the same example for Distance-Weighted k-NN. Evaluate and compare the performance of both the models</p> <table border="1"><thead><tr><th>S1</th><th>S2</th><th>Test Class</th></tr></thead><tbody><tr><td>2</td><td>4</td><td>Negative</td></tr><tr><td>4</td><td>6</td><td>Negative</td></tr><tr><td>4</td><td>4</td><td>Positive</td></tr><tr><td>4</td><td>2</td><td>Negative</td></tr><tr><td>6</td><td>4</td><td>Negative</td></tr><tr><td>6</td><td>2</td><td>Positive</td></tr></tbody></table>	S1	S2	Test Class	2	4	Negative	4	6	Negative	4	4	Positive	4	2	Negative	6	4	Negative	6	2	Positive
S1	S2	Test Class																				
2	4	Negative																				
4	6	Negative																				
4	4	Positive																				
4	2	Negative																				
6	4	Negative																				
6	2	Positive																				
4	<p><b>Mini Project</b></p> <p>Review and analyze the literature for various machine learning techniques and applications. Using Machine Learning concepts covered in the assignments and Machine Learning theory course, design and develop an application/Decision Support System for the selected problem statement. Visualize the results with comparative performance analysis of different models (minimum 3) using suitable methods.</p> <p>For Example: Health Care domain for predicting disease, Agriculture sector for Fruits Classification or Soil Classification or Leaf Disease Classification.</p> <p><b>Note:</b></p> <ul style="list-style-type: none"><li>Students should develop an application in the group of 3-4 students and submit the project report which will consist of documentation related to Machine Learning model design.</li><li>Document the findings and analysis in the analysis report preferably in IEEE Research Paper format.</li><li>A Mini Project in this course should facilitate Project Based Learning among students.</li></ul>

<b>Part II: Fundamental of Blockchain</b>	
<b>Suggested list of Assignments</b>	
<b>Assignment No.</b>	<b>Assignment Title</b>
<b>1</b>	Write a smart contract in solidity to perform basic arithmetic operations.
<b>2</b>	Write a program using Solidity for bank Transactions such as get balance, deposit and withdrawal etc.
<b>3</b>	Write a program using Solidity to Contract Smart Construction.
<b>4</b>	Build any simple smart contract and Test it with Truffle framework.
<b>5</b>	Study of Geth and Ganache Tools to Create a private Block chain, Creation of Account and Mining using geth.
<b>6</b>	Create and Configure Genesis block.
<b>7</b>	<p>Using the BlockChain Concepts in Theory course and assignments covered in Group A above, Students should develop an application in a group of 2-3 students.</p> <p><b>Create a Blockchain on Testnet for storing any critical information.</b> Document the findings and analysis in the analysis report preferably in IEEE Research Paper format</p> <p><b>Note:</b></p> <ul style="list-style-type: none"> <li>● Instructor should maintain the progress report of the mini project throughout the semester from the project group and assign marks as a part of the term work.</li> <li>● Oral examination will be on the Solution Proposed in Mini Project and BlockChain concepts used in the laboratory assignments.</li> <li>● Practical examination will be on Laboratory assignments given in Professional Elective Course- Mini Project in this course should facilitate Project Based Learning among students.</li> </ul>

**Part III: Full Stack Development****Guidelines for Students**

1. The laboratory assignments are to be submitted by students in the form of a journal.
2. Journal consists of prologue, certificate, table of contents and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Software & Hardware requirements, Date of Completion, Assessment grade/marks and assessor's sign, Theory- Concept, Conclusion/Analysis).

**Guidelines for Laboratory /TW Assessment**

1. Continuous assessment of laboratory work is done based on overall performance and Laboratory performance of students.
2. Each Laboratory assignment assessment should assign grade/marks based on parameters with appropriate weightage.
3. Suggested parameters for overall assessment as well as each Laboratory assignment assessment include- timely completion, performance, innovation, efficiency, punctuality, and neatness.

**Guidelines for Laboratory Conduction**

1. All assignments are compulsory.
2. Students are expected to work in groups of 3 to 4 for mini project.

**Suggested list of Assignments**

Assignment No.	Assignment Title
1	Design a registration form using AngularJS inputs, and services for web application development.
2	Prepare product registration form using modules and controller in AngularJS
3	Design a web application for Product info, e-commerce, or any other applications that can have transaction details using Node.js and Express
4	Design a web application for e-commerce or students feedback review systems or any other applications with MongoDB Backend. using Node.js and Express.
5	Mini project -Design a web application for real world scenarios

Group B	
Part IV: Image & Video Processing	
<b>Guidelines for Students:</b> <ol style="list-style-type: none"> <li>1. The laboratory assignments are to be submitted by student in the form of journal. Journal consists of Prologue, Certificate, Table of Contents, and Handwritten Write-up of each assignment (Title, Objectives, Theory- Concept in brief, Algorithm, Flowchart, Test cases, Date of Completion, Assessment grade/marks and assessor's sign, Conclusion).</li> <li>2. Program codes with sample output of all performed assignments are to be submitted as softcopy.</li> <li>3. As a conscious effort and little contribution towards Green IT and environment awareness, attaching printed papers as part of write-ups and program listing to journal may be avoided. Use of DVD containing student's programs maintained by lab In-charge is highly encouraged. For reference one or two journals may be maintained with program prints at Laboratory.</li> </ol>	
<b>Guidelines for Laboratory /TW Assessment:</b> <ol style="list-style-type: none"> <li>1. Continuous assessment of laboratory work is done based on overall performance and lab assignments performance of student. Each lab assignment assessment will assign grade/marks based on parameters with appropriate weightage.</li> <li>2. Suggested parameters for overall assessment as well as each lab assignment assessment include- timely completion, performance, innovation, efficient codes, punctuality and neatness.</li> </ol>	
<b>Guidelines for Laboratory Conduction</b> <ol style="list-style-type: none"> <li>1. Each student must perform all assignments provide in a list.</li> <li>2. Operating System recommended: - 64-bit Open-source Linux or its derivative.</li> <li>3. Programming tools recommended: - C/ C++/ JAVA/ PYTHON/ MATLAB</li> </ol>	
Suggested list of Assignments	
Assignment No.	Assignment Title
1	Apply any 4 point processing techniques on sample image.
2	Apply any 4 mask processing techniques on sample image.
3	Plot the histogram of an image and perform histogram equalization.
4	Perform Edge detection using Sobel, Prewitt and Roberts gradient operators.
5	Compress given image using cosine transform.
6	Extract the visual part from digital video and perform point processing method on video frames.
7	Mini Project based on a problem statement approved by the faculty member. Note: <ul style="list-style-type: none"> <li>• Instructor should maintain progress report of mini project throughout the semester from project group and assign marks as a part of the term work</li> <li>• Oral examination will be on the Solution Proposed in Mini Project and Image and video processing Concepts used in the laboratory assignments.</li> <li>• Practical examination will be on Laboratory assignments given in Project Based Learning Laboratory- Image &amp; Video processing.</li> <li>• Mini Project in this course should facilitate Project Based Learning among students.</li> </ul>

**Part V: Internet of Things**

**Guidelines for Students:**

1. The laboratory assignments are to be submitted by students in the form of a journal.
2. Journal consists of prologue, certificate, table of contents and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Date of Completion, Assessment grade/marks and assessor's sign, Theory- Concept, algorithm, sample input and expected output, conclusion).
3. As a conscious effort and little contribution towards Green IT and environment awareness, attaching printed papers as part of write-ups and program listing to journal may be avoided. Use of DVD containing student's programs maintained by lab In-charge is highly encouraged. For reference one or two journals may be maintained with program prints at Laboratory.

**Guidelines for Laboratory /TW Assessment:**

1. Continuous assessment of laboratory work is done based on the overall performance and laboratory performance of students.
2. Each laboratory assignment assessment should assign grade/marks based on the parameters with appropriate weightage.
3. Suggested parameters for overall assessment as well as each laboratory assignment assessment includes- performance, timely completion, innovation, efficiency, punctuality, and neatness.

**Guidelines for Laboratory Conduction**

1. Operating System: 64-bit Open-source Linux or its derivative.
2. Programming Tools: Open-Source PYTHON.
3. All assignments are compulsory to perform.

**Suggested list of Assignments**

Assignment No.	Assignment Title
1	Study of Raspberry Pi and Arduino Uno development boards. Understand the process of OS installation on the Raspberry Pi. Start Raspberry Pi and try various Linux commands in command terminal window: ls, cd, touch, mv, rm, man, mkdir, rmdir, tar, gzip, cat, more, less, ps, sudo, cron, chown, chgrp, ping etc.
2	Write an application to read temperature using LM-35 temperature sensor and Arduino board. If temperature crosses certain threshold value, then notify the user with buzzer.
3	Interface IR sensor to Raspberry Pi. Write a program to detect obstacle using IR sensor and notify it using LED.
4	Automate the T-Rex Dino Game in chrome browser using servo motor, light-dependent resistor and Arduino Uno.
5	Write a program to solve a system of linear congruence by applying the Chinese Remainder Theorem.
6	Write an application to detect fire and notify the user with buzzer or by sending SMS using GSM module

7	<p><b>Mini Project:</b> Implement any societal problem using suitable IoT hardware and protocols.</p> <ul style="list-style-type: none"> <li>• Security management</li> <li>• Health emergencies</li> <li>• Road traffic management</li> <li>• Energy Conservation</li> <li>• Agricultural Problems</li> <li>• Rural development</li> <li>• Smart city</li> </ul>

<b>Part VI- Software Project Management</b>	
<p><b>Guidelines for Students</b></p> <ol style="list-style-type: none"> <li>1. The laboratory assignments are to be performed and submitted by students in a group of 3-4 students in the form of journal. Journal consists of Certificate, table of contents, and handwritten write-up of each assignment (Title, Date of Completion, Objectives, Problem Statement, Software and Hardware requirements, Assessment grade/marks and assessor's sign, Theory- Concept in brief, algorithm, flowchart, test cases, Test Data Set (if applicable), mathematical model (if applicable), conclusion/analysis.</li> <li>2. Program codes with sample output of all performed assignments are to be submitted as softcopy.</li> <li>3. As a conscious effort and little contribution towards Green IT and environment awareness, attaching printed papers as part of write-ups and program listing to journal must be avoided. Use of DVD containing student's programs maintained by Laboratory In-charge is highly encouraged.</li> <li>4. For reference one or two journals may be maintained with program prints in the Laboratory.</li> </ol> <p><b>Guidelines for Laboratory/TW Assessment</b></p> <ol style="list-style-type: none"> <li>1. Continuous assessment of laboratory work should be based on overall performance of Laboratory assignments by a student.</li> <li>2. Each Laboratory assignment assessment will assign grade/marks based on parameters, such as timely completion, performance, innovation, efficient codes and punctuality.</li> </ol>	

**Guidelines for Laboratory Conduction**

1. The instructor is expected to frame the assignments by understanding the prerequisites, technological aspects, utility and recent trends related to the topic.
2. The assignment framing policy need to address the average students and inclusive of an element to attract and promote the intelligent students.
3. Use of open-source software is encouraged. Based on the concepts learned. Instructor may also set one assignment or mini-project that is suitable to respective branch beyond the scope of syllabus.
4. For the elective subject's students should form group of 3-4 students. The faculty coordinator will take care that all the assignment should be assigned to class and minimum two assignments are compulsory for each group.

**Programming tools recommended:** Software project management-MS project/Gantt Project/Primavera

**Suggested list of Assignments**

Assignment No.	Assignment Title
1	Prepare Work breakdown structure (WBS) for identified and selected software Project.
2	Prepare Project Plan for selected Software Project using Critical Path Method.
3	Prepare Project Plan for selected probabilistic Software Project using PERT.
4	Prepare a detailed Project Schedule for selected Software Project considering resource allocation and leveling using CPM.
5	Identify the risk involved and Prepare RMMM plan for selected Software Project.
6	Prepare presentation on Contemporary Software Project Management topic as CMM, PCMM, Agile Project Management, SCRUM, etc.

<b>Program:</b>		<b>B. Tech. (Computer Engineering)</b>		<b>Semester: VI</b>			
<b>Course:</b>		<b>Multivariate Data Analysis using R (OEC-3)</b>		<b>Code: BAS6608</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
03	-	03	03	20	30	50	100
<b>Prior Knowledge of:</b> Descriptive Statistics, Inferential Statistics, Probability, Statistical Data Analysis using R Is essential							
<b>Course Objectives:</b>  1. This course aims at enabling the students to learn multivariate data collection, visualization, and preprocessing techniques for data science.							
<b>Course Outcomes:</b>  After learning the course, the students should be able to: 1. <b>Use</b> data preprocessing methods in R and generate quality data for analysis. 2. <b>Implement</b> R packages and related functions to data science to <b>analyze</b> multivariate data. 3. <b>Describe</b> the multivariate data. using different data visualization techniques to 4. <b>Analyze</b> the multivariate data using dependent analysis methods using the R. 5. <b>Analyze</b> the multivariate data using independent analysis methods using the R. 6. <b>Develop</b> a model for Prediction and Decision Making for a data set.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Data Wrangling</b> Understanding the multivariate data, Standardizing Variables, Accessing Databases with R Software, Merging multiple data sources into a single dataset for analysis, Dealing with Missing values, dealing with extreme outliers in data, discrepancies or removing.						<b>7</b>
<b>II</b>	<b>Multivariate Data and Multivariate Analysis</b> Calculating Summary Statistics for Multivariate Data: Means and Variances Per Group, Between-groups Variance and Within-groups Variance for a Variable, Between-groups Covariance and Within-groups Covariance for Two Variables, Calculating Correlations for Multivariate Data, The multivariate normal density function.						<b>8</b>
<b>III</b>	<b>Multivariate Data Visualization in R Software</b> Geometric projection techniques: Scatter plot matrix, Hyper box, Trellis display, Parallel coordinates, Icon-based techniques: Chernoff faces, Stick figures, Star plots, Color icons, Pixel-oriented techniques: Query-independent techniques: visualize the entire dataset, Query-dependent techniques: visualize a subset of data that are relevant to the context of a specific user query, Hierarchical techniques, Hybrid techniques						<b>8</b>
<b>IV</b>	<b>Dependent Analysis</b> Multiple linear regression, Conjoint Analysis, Multiple Discriminant Analysis, Linear Probability Analysis, Multivariate analysis of variance (MANOVA), Canonical Correlation Analysis, Structural Equation Modeling						<b>7</b>

<b>V</b>	<b>Independent Analysis</b> Factor Analysis: Factor analysis model, the k-factor analysis model, Estimating the parameters in the k-factor analysis model. Cluster Analysis: Cluster analysis, K-means clustering, Displaying clustering solutions graphically, multidimensional Scaling, Correspondence Analysis	<b>7</b>
<b>VI</b>	<b>Multidimensional Scaling</b> Models for proximity data, Spatial models for proximities: Multidimensional scaling, Classical multidimensional scaling, non-metric multidimensional scaling. <b>Linear Discriminant Analysis</b> : Loadings for the Discriminant Functions, Separation Achieved by the Discriminant Functions, A Stacked Histogram of the LDA Values, Scatter plots of the Discriminant Functions, Allocation Rules and Misclassification Rate.	<b>8</b>
	<b>Total</b>	<b>45</b>

**\*Instead of the conventional mode of examination for MTE and ETE; Examination will be conducted using R software in the laboratory through proper invigilation.**

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>				<b>Semester: VI</b>		
<b>Course:</b>	<b>Remote Sensing and GIS (OEC-3)</b>				<b>Code: BCI6603A</b>		
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
03	-	03	03	20	30	50	100
<b>Prior Knowledge of:</b> Fundamental related to Surveying, types and Importance of various surveys ,Global Positioning System (GPS) Is essential							
<b>Course Objectives:</b> After Completing this course, student will have adequate background : 1. To comprehend fundamentals and principles of RS and GIS techniques. 2. To enhance students' capacity to interpret images and extract information of earth surface from multi-resolution imagery at multi-scale level. 3. To develop skills of Image processing and Geographical Information System 4. To study satellite image processing, satellite image interpretation, digitization and generation of thematic maps in a GIS. 5. To learn buffering and layer analysis for various engineering applications							
<b>Course Outcomes:</b> After learning the course, the students will be able to: 1. Articulate fundamentals and principles of RS techniques. 2. Demonstrate the knowledge of remote sensing and sensor characteristics. 3. Distinguish working of various spaces-based positioning systems. 4. Analyze the RS data and image processing to utilize in civil engineering 5. Explain fundamentals and applications of RS and GIS 6. Acquire skills of data processing and its applications using GIS							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Introduction to Remote Sensing:</b> Definition and scope, history and development of remote sensing technology, electromagnetic radiation (EMR) and electromagnetic spectrum, EMR interaction with atmosphere and earth surface; atmospheric window, RS platforms, elements of remote sensing for visual interpretation viz. tone, shape, size, pattern, texture, shadow and association, applications in civil engineering/town planning						<b>07</b>
<b>II</b>	<b>Remote Sensing Satellites and Sensor Characteristics:</b> Types and their characteristics, types of sensors, orbital and sensor characteristics of major earth resource satellites, Indian remote sensing satellite programs, introduction to various open-source satellite data portals, global satellite programs, sensor classification, applications of sensor, concept of Swath & Nadir, resolutions, digital image. Introduction to spatial resolution, spectral resolution, radiometric resolution and temporal resolution, visual image interpretation, image interpretation						<b>08</b>
<b>III</b>	<b>GPS and GNSS:</b> Introduction to GNSS and Types, IRNSS, GPS, GPS components, differential GPS, types of GPS tracking, application of GNSS in surveying, mapping and navigation						<b>07</b>

<b>IV</b>	<b>Image Processing and Analysis:</b> Digital image, visual image interpretation, image interpretation keys, concept of spectral signatures curve, digital image processing, preprocessing and post processing, image registration, image enhancement, image transformations, digital image classification (supervised & unsupervised). Digital elevation model (DEM) and its derivatives, triangular irregular network model (TIN) and other models & their applications.	<b>08</b>
<b>V</b>	<b>Fundamentals of GIS:</b> Geographic information system, definition, spatial and non-spatial data, data inputs, data storage and retrieval, data transformation, Introduction to cloud computing (types & applications), data reporting, advantages of GIS, essential elements of GIS hardware, software GIS data types, applications of RS and GIS in civil engineering, hydrogeology, engineering geology, surveying and mapping.	<b>07</b>
<b>VI</b>	<b>GIS Data and Case Studies:</b> GIS data types and data representation, data acquisition, geo-referencing of data, projection systems, raster and vector data, raster to vector conversion, attribute data models and its types, remote sensing data in GIS, GIS database and database management system. Case studies:	<b>08</b>
	<b>Total</b>	<b>45</b>

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>			
<b>Course:</b>	<b>Building Services and Maintenance (OEC-3)</b>			<b>Code: BCI6603B</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ET E</b>	<b>Total</b>
3	-	3	3	20	30	50	100
<b>Course Objectives:</b> 1. To understand the different building services provisions. 2. To study the suitable electrical and mechanical services, fire protection, acoustic, water supply and sound Insulations. 3. To examine the purpose and type of building maintenance.							
<b>Course Outcomes:</b> After learning the course, the students should be able to: 1. Understand different building services provisions. 2. Interpret the importance of building ventilation. 3. Distinguish the suitable electrical as well mechanical services for particular requirements of buildings. 4. Discover the knowledge of Fire Protection, Acoustic, and Sound Insulations. 5. Provide awareness of laws and regulations of water supply systems related to building services. 6. Select different types of maintenance in building services.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1</b>	<b>Introduction to Building Services:</b> Definitions, Objective and uses of services-different types building, Classification of building services, Types of services and selection of appropriate services for given project.						<b>07</b>
<b>2</b>	<b>Building Ventilation:</b> Natural and artificial lighting principles and factors, Arrangement of luminaries, Distribution of illumination, Utilization factors, Necessity of Ventilation Types – Natural and Mechanical Factors to be considered in the design of Ventilation.						<b>08</b>
<b>3</b>	<b>Electrical Services &amp; Mechanical Services in Buildings:</b> Electrical services in the building technical terms and symbols for electrical installations and Accessories of wiring, Systems of wiring Plumbing & Air-Conditioning, Air Distribution system, Cleaners,						<b>08</b>
<b>4</b>	<b>Fire Protection, Acoustic and Sound Insulations:</b> Introduction, causes of fire and Effects of fire, General Requirements of Fire Resisting building as per IS and NBC 2005, Requirement of good Acoustic, Various sound absorbent, Factors to be followed for noise control in residential building.						<b>08</b>
<b>5</b>	<b>Water and Sanitation Water quality Purification and treatment:</b> - water supply systems-distribution systems municipal bye laws and regulations, Rain Water Harvesting Sanitation in buildings, arrangement of sewerage systems in housing.						<b>07</b>

<b>6</b>	<b>Building Maintenance:</b> Role of maintenance in durability and serviceability of buildings, Economic aspects of maintenance. Different types of maintenance.	<b>07</b>
	<b>Total</b>	<b>45</b>
<b>Text Books:</b> 1. A text book on Building Services R. Udaykumar Eswar Press, Chennai 2. Building Services S. M. Patil Seema Publication, Mumbai Revised edition 3. National Building Code of India - 2005 Bureau of Indian Standards BIS, New Delhi.		
<b>Reference Books:</b>  1. Building Construction Dr. B. C. Punmia Laxmi Publications (P) Ltd., New Delhi 2. Building Construction P. C. Varghese PHI Learning (P) Ltd., New Delhi 3. Building repair and Maintenance Management P. S. Gahlot CBS Publishers & Distribution(P) Ltd

Program:	B. Tech. (Computer Engineering)			Semester: VI			
Course:	Designing with Raspberry Pi (OEC-3)			Code: BET6601			
Teaching Scheme				Evaluation Scheme			
Lecture	Tutorial	Credit	Hours	IE	MTE	ETE	Total
03	-	03	03	20	30	50	100
<b>Prior Knowledge of:</b> Basics of Programming Is essential							
<b>Course Objectives:</b>  1. To explain fundamentals of Raspberry pi (Rpi) and installation of OS in Rpi 2. To demonstrate the Python programming and interfacing of sensors and actuators with Rpi 3. To describe the Node-RED tool used in Rpi and its applications.							
<b>Course Outcomes:</b>  After completion of this course, students should be able to: 1. <b>Describe</b> the basic specifications and operating systems of Raspberry Pi. 2. <b>Illustrate</b> the usage of Node-RED tool for Raspberry Pi programming. 3. <b>Understand</b> the Python programming concepts. 4. <b>Apply</b> the concepts of programming for sensor interfacing with RPi. 5. <b>Apply</b> the concepts of programming for actuator interfacing with RPi. 6. <b>Design</b> IoT based applications with Python programming and Raspberry Pi.							
Detailed Syllabus							
Unit	Description						Duration (H)
I	<b>Getting started with Raspberry Pi</b> Basic functionality of Raspberry Pi board, Physical design and specifications, GPIO Pin description of Rpi, Reading the datasheet of RPi, comparison of various Rpi models, Rpi as mini- computer. Introduction of various operating systems of Rpi, Installation of Raspbian/Noobs/OSMC operating system on Rpi, first boot and basic configuration of Rpi, Introduction to Linux commands required to configure Rpi, Overview of Graphic User Interface (GUI).						08
II	<b>Getting started with Node-RED tool on Rpi</b> Prerequisite for Node-RED, Installing and upgrading Node-RED, Running Node-RED app locally and as a service on network, auto-start on boot, opening the editor, installation of various libraries for Node-RED, adding node, add debug node, wire the nodes, deploy the flow.						06
III	<b>Programming the Raspberry Pi</b> Introduction to Python programming language: Python Programming Environment, Python Expressions, Strings, Functions, Data types in python, importing libraries, flow control, conditional statement, Loops.						10
IV	<b>Sensor interfacing with Rpi</b> Basics of sensors: What are sensors? Types of sensors Sensor interfacing: Temperature and Humidity sensor (DHT11), PIR Motion sensor, obstacle detection using Ultrasonic sensor, soil moisture sensor						06

<b>V</b>	<b>Actuator interfacing with Rpi</b> Basics of actuators: What are actuators?, Their need in making a closed loop system Actuator interfacing: Electronic Relays, LED's, Buzzers/Fan, DC Motor, Stepper motor, LCD.	<b>07</b>
<b>VI</b>	<b>Case Study based following topics</b> Home Automation, Smart City, Smart Farming, Smart Transportation, Health and Lifestyle, Pollution Monitoring system	<b>08</b>
	<b>Total</b>	<b>45</b>

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>			
<b>Course:</b>	<b>Basics of Automotive Electronics (OEC-3)</b>			<b>Code: BET6602</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
03	-	03	03	20	30	50	100
<b>Prior Knowledge of:</b> Electrical & Electronics Is essential							
<b>Course Objectives:</b>  1. To introduce Electronics Control Unit(ECU) used in Automotive applications. 2. To apply operating principles of sensors and actuators used in automotive. 3. To explore the role of electronic systems in Active and passive safety systems.							
<b>Course Outcomes:</b>  1. To apply the concept of electronics systems in automotive applications. 2. To explore different sensors and actuators. 3. Illustrate vehicle motion control systems. 4. Understand algorithms used in Engine Control System. 5. Describe the role of electronics in Active and passive safety systems. 6. Make use of automotive components, subsystems, and basics of Electronic Engine Control in the automotive industry.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
1	<b>Automotive Systems Overview:</b> Automotive vehicle technology, Present trends in automobiles with emphasis on increasing role of electronics and software, Overview of typical automotive subsystems and components, Body, Chassis, and Powertrain Electronics						07
2	<b>Sensors :</b> Basic sensor arrangement, Types of sensors such as oxygen sensors, Crankshaft angle position sensors, Fuel metering/ vehicle speed sensors, Flow sensor, Temperature, Exhaust Gas Oxygen (O2/EGO), Air mass flow sensors, Throttle position sensor, Strain Gauge MAP sensor, Magnetic Reluctance Position Sensor, Hall effect Position Sensor, Engine Coolant Temperature (ECT) Sensor, Piezoelectric Knock Sensor. <b>Actuators :</b> Solenoids, Stepper Motors, Relays, Fuel Injector, EGR Actuator, Ignition System						09
3	<b>Vehicle Motion Control:</b> Typical Cruise Control System, Digital Cruise Control System, Digital Speed Sensor, Throttle Actuator, Digital Cruise Control configuration, Cruise Control Electronics (Digital only), Antilock Brake System (ABS)						07
4	<b>Engine Control System:</b> Algorithms for engine control including open loop and closed loop control system, Electronic ignition, EGR for exhaust emission control.						07

5	<b>Active and passive safety systems:</b> Body electronics including lighting control, Remote keyless entry, Immobilizers, Electronic instrument clusters and dashboard electronics, Antilock braking system, Computer vision based ADAS	<b>07</b>
6	<b>Future Automotive Electronic Systems:</b> Alternative Fuel Engines, Electric and Hybrid vehicles, Fuel cell powered cars, Collision Avoidance Radar warning Systems, Low tire pressure warning system, Voice Recognition Cell Phone dialing, Advanced Cruise Control, Stability Augmentation, Automatic driving Control	<b>08</b>
	<b>Total</b>	<b>45</b>
<b>Text Books:</b> <ol style="list-style-type: none"> <li>1. William B. Ribbens, “Understanding Automotive Electronics- An Engineering Perspective”, 7<sup>th</sup> edition, Butterworth-Heinemann Publications, 2017.</li> <li>2. Ronald K. <b>Program:</b>		<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>		
<b>Course:</b>		<b>Web Technology (OEC-3)</b>			<b>Code: BIT6601</b>		
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
03	-	03	03	20	30	50	100
<b>Prior knowledge of</b> Computer Fundamentals , Any one computer Language Is essential							
<b>Course Objectives:</b>  1. To write a valid standards-conformant HTML document involving a variety of element types, including hyperlinks, images, lists, tables, and forms 2. To use CSS to implement a variety of presentation effects in HTML and XML documents, including explicit positioning of elements 3. To demonstrate techniques for improving the accessibility of an HTML document 4. To learn the concepts commonly used in dynamic language programming, such as introspection, higher-order functions, and closures.							
<b>Course Outcomes:</b>  After learning the course, the students will be able to: 1. Illustrate static website development using HTML and CSS. 2. Demonstrate static and dynamic website development using Bootstrap. 3. Discuss the basics of JavaScript in Web Development. 4. Make use of AJAX and JQuery in mobile website development 5. Describe MVC architecture as Front end framework. 6. Build responsive web application using ReactJS							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1.</b>	<b>HTML</b> Getting started with HTML, Why HTML, Tags and Elements, Attributes, Properties, Headings list, Links, Tables, Images, HTML Form, Media (Audio, Video), Semantic HTML5 Elements. <b>CSS:</b> Types of CSS, How to use CSS, Properties, Classes, Child-Class (Nested CSS), Colors, Text, Background, Border, Margin, Padding, Positioning (flex, grid, inline, block), Animation, Transition.						<b>6</b>
<b>2.</b>	<b>BOOTSTRAP</b> CSS over Bootstrap, How to Use Bootstrap, Bootstrap Grid System, Bootstrap Responsive, Bootstrap Classes, Bootstrap Components (i.e., Button, Table, List, etc.),Bootstrap as a Cross Platform. W3C: What is W3C, How W3C handles /Supports Web Technologies.						<b>6</b>

3.	<b>JavaScript</b> Introduction to Scripting languages, Introduction to JavaScript (JS), JS Variables and Constants, JS Variable Scopes, JS Data Types, JS Functions, JS Array, JS Object, JS Events. Advanced JavaScript: JSON - JSON Create, Key-Value Pair, JSON Access, JSON Array, JS Arrow Functions, JS Callback Functions, JS Promises, JS Async-Await Functions, JS Error Handling	7
4.	<b>AJAX</b> Why AJAX, Call HTTP Methods Using AJAX, Data Sending, Data Receiving, AJAX Error Handling. JQUERY :Why JQuery, How to Use, DOM Manipulation with JQuery, Dynamic Content Change with JQuery, UI Design Using JQuery.	10
5.	<b>Front-End Frameworks</b> Web Framework Types. MVC: What is MVC, MVC Architecture, MVC in Practical, MVC in Web Frameworks. TypeScript: Introduction to TypeScript (TS), Variables and Constants, Modules in TS.	6
6.	<b>ReactJS</b> Introduction to ReactJS, React Components, Inter Components Communication, Components Styling, Routing, Redux- Architecture, Hooks- Basic hooks, useState() hook, useEffect() hook, useContext() hook	10
	<b>Total</b>	<b>45</b>
<b>Text Books:</b> <ol style="list-style-type: none"> <li>1. Ralph Moseley &amp; M. T. Savaliya, "Developing Web Applications", Wiley publications, ISBN 13: 978812653867</li> <li>2. Jeremy McPeak &amp; Paul Wilton, "Beginning JavaScript", Wrox Publication, ISBN-13: 978-0470525937</li> </ol>		
<b>Reference Books:</b> <ol style="list-style-type: none"> <li>1. Steven Holzner, "HTML Black Book", Dremtech press.</li> <li>2. Web Technologies, Black Book, Dreamtech Press</li> <li>3. Web Applications: Concepts and Real World Design, Knuckles, Wiley-India</li> <li>4. Internet and World Wide Web How to program, P.J. Deitel &amp; H.M. Deitel Pearson.</li> </ol>		

<b>Program:</b>		<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>		
<b>Course:</b>		<b>3D Printing and Modeling (Open Elective-III)</b>			<b>Code: BME6603A</b>		
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
03	-	03	03	20	30	50	100
<b>Prior knowledge of basics of</b> Materials Engineering ,CAD software are essential Is essential							
<b>Course Objectives:</b> 1. To understand the importance of 3D Printing process for various applications. 2. To be familiar with the different 3D printing process. 3. To create CAD model that satisfy product development/prototyping requirements.							
<b>Course Outcomes:</b> The Students will be able to, 1. Understand the meaning and generic steps of the 3D printing process. 2. Identify the effects of critical parameters in the Stereo lithography and Solid ground curing process. 3. Identify the effects critical parameters in the Laminated object manufacturing and Fused Deposition Modeling Process. 4. Identify the effects critical parameters in the Selective laser sintering process and Direct Energy deposition. 5. Develop the STL file and create sliced model by using open source software 6. Understand the various application of 3D printing process.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1</b>	<b>Introduction to 3D Printing:</b> Meaning of 3D Printing, The Generic/steps in 3D printing Process, Materials used in 3D Printing, Types of 3D Printing process and Benefits of 3D printing, Design for Additive manufacturing (DFAM).						<b>8</b>
<b>2</b>	<b>Liquid based systems:</b> Stereo lithography apparatus (SLA): Specifications, parameters, process, working principle, photopolymers, photo polymerization, layering technology, laser and laser scanning, applications, advantages and disadvantages. Solid ground curing (SGC): Specifications, parameters, process, working principle, applications, advantages and disadvantages.						<b>7</b>
<b>3</b>	<b>Solid based systems:</b> Laminated object manufacturing (LOM): Specifications, parameters, Process, Working principle, Applications, Advantages and disadvantages. Fused Deposition Modeling (FDM): Specifications, Process, parameters, Working principle, Applications, Advantages and disadvantages.						<b>7</b>
<b>4</b>	<b>Powder Based Systems:</b> Selective laser sintering (SLS): Specifications, process, parameters, working principle, applications, advantages and disadvantages. Direct Energy deposition (DED): Specification, parameters, process, working principle, applications, advantages and disadvantages.						<b>8</b>

5	<b>Modelling in 3D printing:</b> Meaning of STL file, Special rules for the STL format, Meaning of Slicing, Components of Slicing software, Preparation of CAD models, Converting into STL file, slicing by using open source software.	8
6	<b>Applications of 3D Printing:</b> Prototyping and manufacturing, Medical applications, Automotive applications, Aerospace & Defence applications, Constructions applications. Art and Jewellery applications.	7
	<b>Total</b>	<b>45</b>
<b>Text Books:</b> <ol style="list-style-type: none"> <li>1. Ian Gibson, David Rosen, Brent Stucker, Additive Manufacturing Technologies, Third Edition, Springer Publications, 2020. 03	-	03	03	20	30	50	100
<b>Prior knowledge of :</b> Data Science , Machine Learning ,Python/R programming Is essential							
<b>Objectives:</b> 1. To Acquaint students about materials, their properties, structure property relationship. 2. To create awareness about the importance of statistics in materials data analysis. 3. To imbibe significance of data science, machine learning in use, selection and analysis of materials.							
<b>Outcomes:</b> The Students will be able to, 1. Compare different materials based on their structures. 2. Interpret material property data and draw conclusions. 3. Apply statistical methods for materials data analysis. 4. Use programming languages like python/R programming for materials data analysis. 5. Apply machine learning algorithm for interpretation of materials data.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1.</b>	<b>Introduction to materials:</b> Classification of materials, structure of materials : Atomic structure, crystal structure and microstructure, material properties: Physical, Mechanical, Electrical, Magnetic etc.						<b>7</b>
<b>2.</b>	<b>Materials Information:</b> Structure property relationship, Applications and selection of materials, Analysis and synthesis of materials.						<b>7</b>
<b>3.</b>	<b>Statistics and Materials:</b> Basic probability and statistics, basic R/ Python , Inaccuracies and error and its propagation, Descriptive data analysis, Probability distributions, Probability distributions using R/Python, Fitting functions to data: regression, testing significance of fit.						<b>8</b>
<b>4.</b>	<b>Experimental data:</b> Processing of experimental data using R/Python, R/Python for graphical handling of data and fitting.						<b>7</b>
<b>5.</b>	<b>Feature extraction:</b> Statistical features, Principal Component Analysis. Feature selection: Ranking, Decision tree - Entropy reduction and information gain, Exhaustive, best first, Greedy forward & backward, Applications of feature extraction and selection algorithms in materials Engineering.						<b>8</b>
<b>6.</b>	<b>Classification:</b> Decision tree, Random forest, Naive Bayes, Support vector machine. Regression: Logistic Regression, Support Vector Regression. Regression trees: Decision tree, random forest, K-Means, K-Nearest Neighbor (KNN). Applications of classification and regression algorithms in materials Engineering.						<b>8</b>
	<b>Total</b>						<b>45</b>

<b>Prior Knowledge of:</b> Physics ,Mathematics Programming Language Is essential							
<b>Course Objectives:</b> 1. To understand the concept of smart city and associated challenges 2. To understand latest technologies used in intelligent building 3. To recognize the concepts of Internet of Things and able to build IoT applications 4. To apply the programming and use of Arduino and Raspberry Pi boards for Smart Cities							
<b>Course Outcomes:</b> After learning the course, the students will be able to:- 5. Understand the concept of smart city and associated challenges 6. Identify latest technologies used in intelligent building 7. Implement program and configure Arduino boards for various designs 8. Demonstrate Python programming and interfacing for Raspberry Pi. 9. To design IoT applications in different domains							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
1	<b>Introduction to Smart cities</b> Introduction to city planning, Concept, Principle stakeholders, key trends in smart cities developments						07
2	<b>Smart Cities Regulations</b> Understanding smart cities, Global Standards and performance benchmarks, Practice codes for smart city development						07
3	<b>Smart Cities Planning and Development</b> Smart city planning and development, Dimension of smart cities, Financing smart cities development, Governance of smart cities						07
4	<b>IoT in Construction</b> Introduction to Internet of Things, Characteristics of IoT, Physical design of IoT, Functional blocks of IoT, Sensing, Actuation, Basics of Networking, Communication Protocols, Sensor Networks.						08
5	<b>Introduction to Arduino Programming,</b> Integration of Sensors and Actuators with Arduino for smart city applications						08
6	<b>Introduction to Python and Raspberry pi for Smart Cities</b> Python programming, Introduction to Raspberry Pi, Interfacing Raspberry Pi with basic peripherals, Implementation of IoT with Raspberry Pi for Smart Cities and Smart Homes						08
	<b>Total</b>						<b>45</b>

<b>Prior Knowledge of:</b> Basics of air conditioning , Basics of Electrical Engineering ,Basics of Mechanical Engineering Is essential							
<b>Course Objectives:</b> After Completing this course, student will have adequate background : 1. To learn the concept of HVAC 2. To recognize the technologies used in electrical services 3. To understand the concepts of plumbing services 4. To learn the fire protection system							
<b>Course Outcomes:</b> After learning the course, the students will be able to: 1. Analyse and design HVAC system 2. Implement the technologies used in electrical services 3. Apply plumbing services 4. Design fire protection system							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
1	<b>HVAC</b> Introduction to HVAC, Basic Components of Air-Conditioning and Refrigeration machines, Classification of Air-Conditioning System , Categories of Air Conditioning , Study of sychometric Charts , Load Calculation, Air Distribution System, Static Pressure Calculation, Hydronic System, VRF/VRV System, Air Conditioning Concepts, Ventilation systems.						07
2	<b>Basics of Electrical Implementations</b> General, Codes & Standards to be followed, Electrical equipment's and its application used in the installation, Means of electrical distribution for installation, Major electrical loads used in the installation, Electrical design calculations, Various design stages & Sequence of electrical design procedure.						08
3	<b>Electrical Analysis and Design</b> Major electrical loads used in the installation, Electrical design calculations, Various design stages & Sequence of electrical design procedure.						07
4	<b>Plumbing</b> Plumbing Systems, Design of Domestic Water Supply and Distribution System, Design of Sanitary Drainage System, Drawings – Plumbing Layouts.						08
5	<b>Fire Protection system</b> Introduction To Fire Fighting, Classification Of Fire (Description), Fire Extinguisher Types- Using Procedure And General Maintenance, Fire Protection Systems-1. Active 2. Passive Refuge Areas – Rules & Regulations.						07

6	<b>Fire Alarm System</b> Designing of fire alarm system, NFPA, NBA & FSAI Code For Fire Fighting System Designing, Fire Fighting, Hydraulic Calculation For High Rise Buildings, Fire norms for new project construction.	<b>08</b>

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>			
<b>Course:</b>	<b>Designing with Arduino platform (OEC-4)</b>			<b>Code: BET6603</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>			
<b>Lecture</b>	<b>Tutorial</b>	<b>Credit</b>	<b>Hours</b>	<b>IE</b>	<b>MTE</b>	<b>ETE</b>	<b>Total</b>
03	-	03	03	20	30	50	100
<b>Prior knowledge of:</b> The Basics of programming Is essential							
<b>Course Objectives:</b>  1. To make the students aware of the Arduino platform in terms of the physical board, Arduino IDE and libraries. 2. To make the students aware of circuit prototyping, and interfacing of peripherals with Arduino.							
<b>Course Outcomes:</b> After completion of the course, students will be able to: 1. Summarize the features of the Arduino board. 2. Apply the programming concepts to the Arduino board. 3. Make use of analog and digital pins of Arduino. 4. Develop a system to monitor the real-time parameters using Arduino. 5. Illustrate the Object detection using Arduino. 6. Realize the Sound sensing and distance measurement using Arduino.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1.</b>	<b>Knowing Your Arduino:</b> Introduction of Arduino Uno, Atmega328P,Arduino Shields, getting to know the Arduino Uno Pins, power, clock, Using the digital input and output pins, analog input and output pins, Introduction to Serial (UART) communications, I <sup>2</sup> C (TWI) communications, SPI communications						<b>07</b>
<b>2.</b>	<b>Arduino Ide And Programming Concepts.</b> An introduction to the Arduino IDE: Getting and installing the Arduino IDE and uploading a sketch to your Arduino. An introduction to Arduino programming, Understand the basic parts of an Arduino sketch, custom functions Creating custom functions and the return keyword, Using variables, constants, Introduction to control structures: The "if", " while", "For", " Switch" statement						<b>08</b>
<b>3.</b>	<b>Arduino Programming Hands On</b> Digital input/output - how to read the state of a button control an LED, Analog input/ output - how to read the state of a potentiometer and create a fading LED, Introduction to the RGB (color) LED, Wiring the RGB LED, RGB LED: creating colors, using a library to control an RGB LED with PWM.						<b>08</b>
<b>4.</b>	<b>Monitoring Real Time Parameters Using Arduino</b> Interfacing of Ultra -violet light sensor, RGB color sensor, DHT22 sensor, LM 35 to Arduino for monitoring the parameters like temperature, humidity, etc.						<b>07</b>

<b>5.</b>	<b>Interfacing With Arduino - I.</b> Introduction to detecting acceleration with the ADXL335, Plugging the ADXL335 directly in the Arduino, and detect its orientation, A demonstration of using the IR and PIR sensor with the Arduino	<b>07</b>
<b>6.</b>	<b>Interfacing With Arduino - II.</b> Introduction to the ultrasonic distance sensor, Wiring and understanding Trigger and Echo, and calculating distance. Introduction to the analog sound sensor, A demonstration and sketch of the analog sound sensor and the digital sound sensor. Case study elaborating the use of Arduino in various applications.	<b>08</b>
	<b>Total</b>	<b>45</b>

<b>Prior knowledge of</b> Fundamentals of computer networks , Electric machines Is essential							
<b>Course Objectives:</b> 1. To make student understand basics of EVs, including EV Components, architecture, and energy management. 2. To make student able to compare various topologies of EV communication systems. 3. To introduce student about connectors and chargers in EV’s 4. To make student to evaluate the impact of EVs in Connected Mobility and Autonomous Mobility							
<b>Course Outcomes:</b> After learning the course, the students should be able to: 1. Understand the basics of e-vehicles 2. Illustrate the EV Components and controlling units. 3. Compare various EV Communication protocols & their need in the e-Mobility business 4. Understand the fundamentals of EVSE Communication 5. Analyze connectors and chargers in EVs 6. Apply the Knowledge of e-Mobility through Indian Roadmap Perspective							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
1	<b>EV Basics</b> Overview of EVs and challenges, the architecture of EVs, EV market and promotion, infrastructure needs, energy sources used in EVs & HEVs, medium of power transfer (conductive and wireless), and wireless power transfer.						<b>07</b>
2	<b>EV Components</b> Battery Management System (BMS), BLDC Motors, Inverter Unit, Powertrain Unit and Couplers with Chassis, PDU (Power Distribution Unit), BCM (Body Control Module, ECU, and Tuning Parameters.						<b>07</b>
3	<b>EV Communication protocols</b> Communication Systems in EV (CAN and LIN), V2V, V2G and its applications in power systems, power saving & coordinated charging, the layout of power converters, electrification challenges						<b>08</b>
4	<b>Electric vehicle supply equipment (EVSE)</b> Basics of EVSE, EVSE Power Module selection and technical specification, Selection of EVSE Communication Protocol (PLC / Ethernet / Modbus/ CAN Module), Communication gateway.						<b>08</b>

5	<b>Connectors and Chargers</b> Types of EV charging connectors, EV Plug Standards, Selection and Sizing of Common Types of Connectors and Applications, Selection of AC and DC charger types.	07
6	<b>Charging communication &amp; e-Mobility</b> Communication Interface between the charger and CMS, CCS (Combined Charging System), CHAdeMO, Tesla, Specification of open charge point protocol, Connected Mobility and Autonomous Mobility, e-Mobility: Indian Roadmap Perspective, EV integration in smart grid, social dimensions of EVs.	08
	<b>Total</b>	<b>45</b>

<b>Prior knowledge of</b> Java Programming Language Is essential							
<b>Course Objectives:</b> 1. To learn a new mobile application development environment. 2. To develop problem solving skills with mobile applications. 3. To develop competency for the design, coding and debugging for mobile app development. 4. To build the programming skills using 'Android Programming Language.							
<b>Course Outcomes:</b> After learning the course, the students will be able to: 1. Explore the android environment for mobile application development. 2. Design android user interface for Mobile application. 3. Explore different notification interfaces to facilitate communication between components. 4. Apply different persistent storage techniques used to store and retrieve data in android applications. 5. Make use of SQLite in android application development, 6. Explore android services in android application development.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
1.	<b>Introduction to Android Operating System</b> Android OS design and Features – Android development framework, SDK features, Installing and running applications on Android Studio, Creating AVDs, Types of Android applications, Best practices in Android programming, Android tools. Android application components – Android Manifest file, Externalizing resources like values, themes, layouts, Menus etc, Resources for different devices and languages, Runtime Configuration Changes Android Application, Activities, Activity lifecycle,						08
2.	<b>Android User Interface</b> Measurements – Device and pixel density independent measuring units, Layouts – Linear, Relative, Grid and Table Layouts etc. User Interface (UI) Components – Editable and non-editable TextViews, Buttons, Radio and Toggle Buttons, Checkboxes, Spinners, Dialog and pickers etc Event Handling – Handling clicks or changes of various UI components.Fragments – Creating fragments, Lifecycle of fragments, Fragment states, Adding fragments to Activity, adding, removing and replacing fragments with fragment transactions, interfacing between fragments and Activities, Multi-screen Activities.						08

<b>3.</b>	<b>Intents and Broadcasts</b> Intent – Using intents to launch Activities, Explicitly starting new Activity, Implicit Intents, Passing data to Intents, Getting results from Activities, Native Actions, using Intent to dial a number or to send SMS Broadcast Receivers – Using Intent filters to service implicit Intents, Resolving Intent filters, finding and using Intents received within an Activity Notifications – Creating and Displaying notifications, Displaying Toasts	<b>08</b>
<b>4.</b>	<b>Persistent Storage</b> Files – Using application specific folders and files, creating files, reading data from files, listing contents of a directory Shared Preferences – Creating shared preferences, saving and retrieving data using Shared Preference	<b>05</b>
<b>5.</b>	<b>Database</b> Introduction to SQLite database, creating and opening a database, creating tables, inserting retrieving and deleting data, Registering Content Providers, Using content Providers (insert, delete, retrieve and update)	<b>08</b>
<b>6.</b>	<b>Android Services</b> Introduction of android services and its lifecycle. Location Services,Types of Services, Best practices- Performance, Testing,Privacy, Security etc. Deployment of Application.	<b>08</b>
<b>Total</b>		<b>45</b>
<b>Text Books:</b>  1. Professional Android 4 Application Development, Reto Meier, Wiley India, (Wrox), 2012 2. Android Application Development for Java Programmers, James C Sheusi, Cengage Learning, 2013

03	-	03	03	20	30	50	100
<b>Prior Knowledge of: Not required</b>							
<b>Course Objectives:</b> Students are expected to: 1. Acquire Fundamentals of systems and subsystems which should include different processes, properties. 2. Develop structural and behavioral aspects of general diagramming. 3. Perform a functional analysis. 4. Construct systems engineering requirements.							
<b>Course Outcomes:</b> The Students will be able to, 1. DESCRIBE the methods, Processes and practices of systems engineering. 2. UNDERSTAND Fundamentals of systems and subsystems. 3. DIFFERENTIATE between traditional document-based and model based systems engineering. 4. ANALYZE three pillars of MBSE: languages, methods, and tools. 5. CREATE models and diagrams using modelling language. 6. APPLY Model Based Systems Engineering (MBSE) approach to Engineering problems.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
1.	<b>Introduction to Systems Engineering</b> History / Background, Industrial revolution, Discover Systems Engineering, Systems Engineering definition INCOSE, V-Cycle. Cyber physical systems – Advantages, Necessity and its challenges: a) Security: Control of interfaces, emergent vulnerabilities. b) Data: Privacy, data capture, analysis, access issues, data adequacy and accuracy. c) Regulations and Standards: Policy, Standards. d) Life cycle Sustainment.						8
2.	<b>Fundamentals of MBSE :</b> Introduction, Systems, subsystems and levels, Concrete and abstract objects, Properties, States, event, process, behavior and fact, Systems of interest.						8
3.	<b>Three Pillars of MBSE :</b> Modelling methods, Modelling tools and Modelling language						7
4.	<b>Overview of System Modeling Language</b> SysML Diagram overview, General diagram concepts, the structural aspect and the behavioural aspect, The relationships between behavioural diagrams and structural diagrams						8

5.	<b>Process Modelling with MBSE</b> Approach, The Process Modelling Framework, Using the process modelling framework	7
6.	<b>Requirements Modelling with MBSE</b> Introduction, The Requirements modelling Framework, Using the Requirements modelling Framework (ACRE Process)	7
	<b>Total</b>	<b>45</b>
<b>Text Books:</b> 1. <b>SysML for Systems Engineering, A model-based approach</b> , Jon Holt and Simon Perry, 3rd Edition, The Institution of Engineering and Technology, 2019		
<b>Reference books:</b>  1. Practical Model-Based Systems Engineering, Jose L. Fernandez and Carlos Hernandez, Artech House, 2019 2. System Requirements Analysis, Jeffrey O. Grady, Elsevier, 2nd Edition, 2016. 3. Systems Engineering Fundamentals and Applications, Reinhard Haberfellner, Olivier de Weck Ernst Fricke, Siegfried Vössner, Springer Nature Switzerland AG 2019. 4. NASA Systems Engineering Handbook, National Aeronautics and Space Administration NASA Headquarters Washington, D.C. 20546 December 2007. 5. Systems Engineering: Design Principle and Models, Dahai Liu, CRC Press Taylor & Francis Group, 2016. 6. Systems Engineering Guidebook-A process for developing systems and Products, James N Martin, CRC Press, 2000. 7. INCOSE Systems Engineering Handbook: A Guide for System Life Cycle Processes and Activities, Wiley, 2015.		

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>			
<b>Course:</b>	<b>Electronics Cooling (Open Elective-IV)</b>			<b>Code: BME6604B</b>			
<b>Teaching Scheme</b>				<b>Evaluation Scheme</b>

03	-	03	03	20	30	50	100
<b>Prior knowledge:</b> Engineering Physics, Electronics Components and its mountings, Electronics Packaging Is essential							
<b>Course Objectives:</b>  1. To describe the need for thermal management of electronic components. 2. To introduce the fundamental heat transfer mechanisms of conduction, convection and radiation. 3. To introduce the concept of thermal resistance and illustrate its applications. 4. To provide simple equations and tabulate commonly used thermal properties to enable the learner to perform a first order analysis of heat transfer from an electronic package. 5. To describe various cooling methods typically used or considered.							
<b>Course Outcomes:</b>  After learning the course, students should be able to 1. Realize the need of thermal management of electronics. 2. Summarize sources of heat generation and modes of heat dissipation. 3. Apply the concept of electrical analogy to determine thermal resistance. 4. Examine the appropriate cooling methods as per the application. 5. Evaluate the cooling requirement of electronic packages. 6. Compare the methods of cooling employed in diverse electronics applications.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1.</b>	<b>Introduction to Thermal Management:</b> Electronics Component Packaging Trends, Sources of heat generation, Electronic component failure analysis, Need of Thermal Management, modes of heat dissipation						<b>7</b>
<b>2.</b>	<b>Heat Transfer Principals in Electronics Cooling:</b> Conduction Heat Transfer, Steady and Transient Conduction, Natural Convection in Electronic Devices, Forced Convection Heat Transfer, Radiation Heat Transfer						<b>7</b>
<b>3.</b>	<b>Thermal Resistance:</b> Concept of Electrical Analogy, Thermal Resistance of conduction, convection and radiation, Thermal Contact Resistance, Thermal resistance network, thermal interface material applications, thermal adhesives						<b>8</b>
<b>4.</b>	<b>Electronics Cooling Methods in Industry:</b> Thermal interface and phase change materials, Passive and novel air cooling approaches, microchannel, jet impingement, Thermoelectric Cooling, Immersion Cooling, Vapor Chambers, Cooling Techniques for High Density Electronics.						<b>8</b>

<b>5.</b>	<b>Evaluating Cooling Requirement:</b> Conduction cooling for chassis and circuit boards, Concentrated heat sources, distributed heat sources, Circuit boards with Aluminum Heat Sink, heat transfer across interfaces by conduction and convection	<b>8</b>
<b>6.</b>	<b>Electronics Cooling Applications:</b> Avionics, Data Centers, Mobile, High-Performance Computing, Automotive	<b>7</b>
	<b>Total</b>	<b>45</b>
<b>Text Books:</b> <ol style="list-style-type: none"> <li>1. Dave S. Steinberg, Cooling Techniques for Electronic Equipment, a Wiley-Interscience Publication, John Wiley &amp; Sons, Inc, 1991</li> <li>2. S M Sohel Murshed, Electronics Cooling, ExLi4EvA Publication, 2016.</li> </ol>		
<b>Reference Books:</b> <ol style="list-style-type: none"> <li>1. Y.A. Cengel and A. J. Ghajar, Heat and Mass Transfer – Fundamentals and Applications, Tata McGraw Hill Education Private Limited, 2019</li> <li>2. F.P. Incropera, D.P. Dewitt, Fundamentals of Heat and Mass Transfer, John Wiley, 2009</li> <li>3. J. P. Holman, Heat Transfer, McGraw – Hill publications, 2008</li> </ol>		

<b>Program:</b>	<b>B. Tech. (Computer Engineering)</b>			<b>Semester: VI</b>			
<b>Course:</b>	<b>Project Management (HSMC - 6)</b>			<b>Code: BHM6114</b>

<b>Course Objectives:</b> 1. To help the students gain understanding regarding the concept of projects and Project Management 2. To enable the students to know the key components of project management including project time, cost & Risk management. 3. Recognize issues in a realistic project scenario.							
<b>Course Outcomes:</b> After learning the course, the students will be able to : 1. Understand how to initiate, define and organize a project. 2. Optimize results while managing the triple constraints. 3. Apply appropriate approaches to plan a new project and develop project schedule 4. Analyze the risk associated with various project							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1</b>	<b>Introduction to Project Management</b> Concept and Definition of Project, Characteristics of Project, Concept and definition of Project Management, Functions of Project Management, Importance of Project Management, Who is a Project Manager, Roles & Responsibilities of Project Manager. Understanding the Phases in the Lifecycle of Projects and their Significance, Different types of Projects: Industrial, Telecommunication, Research and more, Project Selection Methods : Agile method & Waterfall methods						<b>7</b>
<b>2</b>	<b>The Triple Constraint in Project Management :</b> The concept of the Triple Constraint in Project Management : Scope, Cost and Time, Project Cost Management : Concept, Consideration, Five types of Costs involved in a project, Cost Management process, Project Time Management and methods of Time estimation, Communications Management in Project , Work Breakdown Structure (WBS). Case studies based on Mega Projects of the World.						<b>7</b>
<b>3</b>	<b>Planning and Execution of Project:</b> Developing a Mission, Vision, Goals of the project. Concept and definition of Project Planning. Importance of Project Planning. Concept and definition of Network Scheduling ,Critical Path Method, Concept of Project Execution, Phases of Project Execution, Project Evaluation; The Review Technique – Planning and Scheduling of Activity Networks - Concept of PERT/CPM, Assumptions in PERT Modeling – Time-cost, Trade-offs, HRM issues in Project Management & How they can be tackled, Quality Circle, Reasons for Failures of Project , Case Study with respect to different Domains						<b>8</b>

<b>4.</b>	<b>Project Monitoring and Risk Management :</b> Concept of Project Monitoring , How to Building a Suitable Monitoring; Control System, Concept of Conflict Management, Concept & Definition of Risk and Risk Management, Concept of Risk Matrix Analysis, Strategies to Manage Risks, An Overview of Useful Techniques and Tools Used in Project Management. Case Studies	<b>8</b>
	<b>Total</b>	<b>30</b>

<b>Prior knowledge of:</b> Basic Financial Literacy Is essential							
<b>Course Objectives:</b>  This course aims at enabling students <ol style="list-style-type: none"><li>1. To develop an understanding of day-to-day working capital decisions; and also longer-term dealing, involving major capital investment decisions and raising long-term finance.</li><li>2. To improve students ‘understanding of the time value of money concept and the role of finance in the current competitive business scenario.</li></ol>							
<b>Course Outcomes:</b>  After learning the course, the students will be able to <ol style="list-style-type: none"><li>1. Understand the basics of financial management and its terms and concepts</li><li>2. Understand financial markets and the role of financial institutions</li><li>3. Apply knowledge of capital budgeting; its allocation, management and funding.</li><li>4. Analyze financial statements and read documents and books of accounts.</li></ol>							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>1.</b>	<b>Introduction to Financial Management-</b> Concept of Business Finance, Objective function in Finance, Traditional and Modern Approaches to Financial Management, Financial Planning - Principles and Steps in Financial Planning and its practical approach.						<b>7</b>
<b>2.</b>	<b>Financial Markets, Institutions and instruments:</b> Introductions to Financial Markets – Nature –Functions and Types of Financial markets, Different Financial Instruments, Sources of financing -Shares, Debentures, Term Loans, Lease & Hire Purchase, Retained Earnings, Public Deposits, Bonds, Trade Credit, Introduction to Bank Finance.						<b>7</b>
<b>3.</b>	<b>Time Value of Money and capital budgeting:</b> Timelines for cash flow, Annuities, Perpetuities, Need and Importance of Capital Budgeting, Different Techniques of Evaluating the Project on the Basis of Payback Period, ARR, NPV, IRR, PPP						<b>8</b>
<b>4.</b>	<b>Financial Statement Analysis:</b> Concept of Financial Statements: Balance Sheet, Profit and Loss Statement, Cash Flow Statement, Tools of Analysis of Financial Statements: Comparative Statements, and Ratio analysis.						<b>8</b>
	<b>Total</b>						<b>30</b>

<b>Course Objectives:</b> 1. To understand the role and importance of entrepreneurship for economic development 2. To seek necessary knowledge and develop skills required for organizing and carrying out entrepreneurial activities. 3. To develop the ability to analyze and understand business situations in which entrepreneurs act.							
<b>Course Outcomes:</b> After learning the course, the students will be able to : 1. Understand the entrepreneurship as an opportunity 2. Optimize the business opportunities that suit aspirant entrepreneurs 3. Appraise the financial schemes and support systems for Entrepreneurship Development. 4. Design a comprehensive business plans.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
1	<b>Introduction to the Entrepreneurship Development :</b>  Concept and definition of Entrepreneurship, The concept of Opportunity Window, Challenges and Misconceptions Related to Entrepreneurship with Indian Context, McClelland’s Need Achievement Theory, Concept of Entrepreneur, Entrepreneurship as a Career, Traits of Successful Entrepreneur, Types of Entrepreneur (proprietary, partnership, collaboration etc), Entrepreneur v/s Intrapreneur, Woman Entrepreneur – A Paradigm Shift , Factors Affecting Entrepreneurship, Types of Enterprises and their Features: Manufacturing, Service and Trading Case Study: Indian Entrepreneurs Pre and Post Covid World, Success stories for few Entrepreneurs.						7
2	<b>Entrepreneurial Opportunities and Process Selection:</b> Concept of Business Opportunity, How to Generate Business Ideas? Identification of Ideal and Viable Business Opportunities, Elements of a good business idea. the entrepreneurial process, Challenges in the Selection of Business Opportunities, Business Opportunities Identification Process, Required Licenses, Approvals and Expertise, Business Value Chain, Different Sections of the Business Value Chain for Potential Opportunities, Understanding Product Costs and Operations Costs; Legal Aspects.						7
3	<b>Finance and Support Systems:</b>  Raising Capital, Venture Capital, Angel Investors, Seed Funding, Role of Government in Promoting Entrepreneurship in India, Start-up India, Atmanirbhar Bharat, Make in India, Assistance to an Entrepreneur, Industrial park, Special Economic Zone, MSME Act, MSME Policy in India, Financial Assistance to MSME, Various Government Schemes - PMEGP, CGTMSE, PMKVY, Mudra Loan, Incubation, Role of Incubation Centers, Support from Incubation Centers						8

4.	<b>Business Plan:</b> Concept and definition of Business Plan, Contents of Business Plan: Executive Summary, Business Concept, Business Strategy, Management Summary, Marketing Plan, Operations Plan, Financial Plan, Presenting Business Plan, Procedure for setting up an Enterprise, Why Do Some Business Plans Fail?	8

Program:	B. Tech. (Computer Engineering)			Semester: VI			
Course:	Android Application Development (Proficiency Course-3)			Code: BCE6915			
Teaching Scheme				Evaluation Scheme			
Practical	Tutorial	Credit	Hours	IE	MTE	ETE	Total
02	-	-	02	-	-	-	-
<b>Prior knowledge of</b> Java Programming Is essential.							
<b>Course Objectives:</b>  1. To learn Basic UI elements of android 2. To learn local Database connectivity of android. 3. To learn foreground and background services 4. To learn read/write operation on files							
<b>Course Outcomes:</b>  After learning the course, students will be able to: 1. Install and configure and android. 2. Develop UI Based android applications 3. Demonstrate the data manipulation using Content Providers, embedded database SQLite 4. Choose suitable software tools, IDE and APIs for the development of Mobile Application 5. Develop android application for file sharing. 6. Acquire skill set to execute applications in Android based devices.							
Suggested List of Assignments							
Assignment No.	Assignment Title						
1	<b>Introduction</b>  Install the Android SDK, Introduction to Basic UI design and Form widgets. <b>Assignment Title: Build</b> a simple UI for sign in page for any application using UI Widgets, Layouts and Adapters. Validate the required fields.						
2	<b>SQLite/Room Database, Handling User Input</b>  <b>Assignment Title: Connect</b> sign in page designed in assignment 1 to database and perform data manipulation operations such as add, delete, update on it.						
3	<b>Networking in Android</b>  <b>Assignment Title:</b> Design an android-based application to implement chat application using socket programming						
4	<b>Audio files, Recycler/list view, services (foreground and background services)</b>  <b>Assignment Title: Develop</b> a mobile application to fetch all audio files and play the audio file when user clicks on any audio file from recycler/list view. Application should play music in background.						
5	<b>Working with images</b>  <b>Assignment Title:</b> Develop a mobile application to fetch images from the sdcard/internal memory. Also provide the facility of deleting, renaming the images.						

<b>6</b>	<b>File sharing in Android.</b>  <b>Assignment Title:</b> Develop an android-based application to implement file Sharing through Bluetooth/wi-fi. Use Java/ Kotlin for programming.

<b>Prior knowledge of.</b> Java Programming Is essential.							
<b>Course Objectives:</b>  1. To develop web-based, network-centric or enterprise applications. 2. To create maintainable, extensible, and flexible web applications using Java Framework like Struts, Hibernate, Spring.							
<b>Course Outcomes:</b>  After learning the course, students will be able to: 1. Comprehend cycle of MVC architecture. 2. Design web application using Struct, hibernate and Spring framework. 3. Implement web services using java. 4. Integrate technological stack to develop an application.							
<b>Guidelines for Students:</b>  1. The laboratory assignments are to be submitted by students in the form of a journal. Journal consists of prologue, Certificate, table of contents, and handwritten write-up of each assignment. 2. Each assignment write-up should have Title, Objectives and Outcomes, Theory- Concept in brief, Algorithm, Flowchart, Test cases, Conclusion, Assessment grade/marks and assessor's sign. 3. Program codes with sample output of all performed assignments are to be submitted as soft copy.							
<b>Suggested List of Assignments</b>							
<b>Assignment No.</b>	<b>Assignments</b>						
<b>1</b>	<b>MVC &amp; Struts Framework</b>  MVC, MVC Type1 and Type2 architecture, truts framework? Struts 1 overview, Struts 1 and Struts 2 comparison, Components of Model, Views and Controller in Struts Framework, Declarative and Annotations configuration approaches, <b>Assignment Title:</b> Develop Signin and Signout Application using Struts Framework						
<b>2</b>	<b>Assignment Title:</b> Create Hello World Using Struts – 2						
<b>3</b>	<b>Hibernate Framework</b>  ORM, ORM principle, ORM Implementation, Introduction to Hibernate, Hibernate Architecture, Peristent classes, Hibernate CRUD, setting up connection to DB using Hibernate <b>Assignment Title:</b> Insert the Record of user in database using Hibernate Framework						
<b>4</b>	<b>Spring Framework</b>  Introduction to Spring, Spring Architecture explanation and all its components, Spring MVC, Spring DAO, setting up of Spring framework Download JARs, Configure XML files. <b>Assignment Title:</b> Create a Web Application/Page using Spring Framework						

5	<p><b>Web Services Using Java</b></p> <p>Web services such as protocols, SOAP, RESTful, java web service implementation, JAX-WS and JAX- RS</p> <p><b>Assignment Title:</b> Create a Web Service in Java using SOAP &amp; RESTful</p>
6	<p><b>Assignment Title:</b> Integrate Hibernate application with spring application and use mysql database.</p>

<b>Course Objectives:</b> This course aims at enabling the students  1. To enhance the logical reasoning skills of the students and improve the problem-solving abilities. 2. To improve the overall professional development of students							
<b>Course Outcomes:</b> Students will be able to After learning the course, the students will be: 1. Having adaptive thinking and adaptability through various Quantitative ability concepts. 2. Having critical thinking and innovative skills. 3. Having interest in lifelong learning & developing verbal competencies in the students.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Modern Maths</b> Profit loss, Ratio & Proportion, LCM & HCF, Time speed and Distance, Average, Mean, mode, median, permutation & combination, Probability, Pipe & systems, Mixture validation, Allegations and Mixtures, Simple Interest and Compound Interest.						<b>6</b>
<b>II</b>	<b>Algebra</b> Linear equations, Quadratic equations, Triplets. <b>Geometry</b> Triangles, Polygons (questions on Area Perimeter).						<b>6</b>
<b>III</b>	<b>Mensuration</b> Cube cuboids cone cylinder sphere (questions on volume surface Area) <b>Trigonometry</b> <b>Number System</b> <b>Statistics.</b>						<b>6</b>
<b>IV</b>	<b>Logical Reasoning</b> Clocks and Calendar, Direction sense, Family tree, Syllogism, Seating arrangement, Team formation, Coding and Decoding, Number Series and Letter Series, Ranking and Arrangements, Game-Based Aptitude.						<b>6</b>
<b>V</b>	<b>Data Interpretation</b> Data charts, Data tables, Bar, Pie, Line graphs, Venn diagram.						<b>6</b>
<b>VI</b>	<b>Verbal Ability &amp; Reading Comprehension</b> Subject-Verb Agreement, Articles and Other Determiners, Prepositions, Tenses, Parts of Speech, Active and Passive Voice, Direct and Indirect Speech, Error Spotting and Sentence Correction, Sentence Completion, Synonyms and Antonyms, Reading Comprehension, Para Jumbles.						<b>6</b>
	<b>Total</b>						<b>36</b>

<b>Course Objectives:</b>  1. To gain an understanding on the concepts and strategies related to sustainable development and identify and analyse various conservation methods for renewable and non-renewable resources. 2. To examine biotic and abiotic factors within an ecosystem and to identify energy flow in ecosystem. 3. To understand the value of biodiversity and identify current efforts for it's conservation at national and local level 4. To provide comprehensive overview of environmental pollution and technology associated with monitoring and control.							
<b>Course Outcomes:</b>  After learning the course, the students should be able to: 1. Demonstrate an integrative approach to environmental issues with a focus on sustainability and identify the role of organism in energy transfer in different ecosystem. 2. Distinguish between renewable and non-renewable resources and analyse consumption of resources 3. Identify key threats to biodiversity and develop appropriate policy options for it's conservation. 4. Analyse the impact of environmental pollution and the science behind those problems and potential solutions.							
<b>Detailed Syllabus</b>							
<b>Unit</b>	<b>Description</b>						<b>Duration (H)</b>
<b>I</b>	<b>Multidisciplinary nature of environmental studies</b> Definition, scope and importance, Need for Public awareness, Natural Resources: Renewable and non- renewable resources: Natural resources and associated problems a) Forest b) Water c) Mineral d) Food e) Land f) Energy, Role of an individual in conservation of natural resources, Use of resources for sustainable lifestyle.						<b>03</b>
<b>II</b>	<b>Ecosystems</b>  Concept of an ecosystem, Structure and function of an ecosystem, Producers, consumers and decomposer, Energy flow in the ecosystem, Ecological succession, Food chains, food webs and ecological pyramids, Characteristic features, Case study on Forest ecosystem, Aquatic ecosystem.						<b>03</b>
<b>III</b>	<b>Biodiversity and its conservation</b>  Introduction – Definition: genetic, species and ecosystem diversity, Biogeographical classification of India, Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic values, Biodiversity at global, national and local levels, India as a mega-diversity nation, Hotspots of biodiversity, Threats to biodiversity, Conservation of biodiversity, Case study on any one Hotspot of biodiversity.						<b>03</b>

<b>IV</b>	<b>Environmental Pollution</b>  Definition, Cause, effects and control measures of different pollution: a. Air b. Water soil d. Noise e. Thermal f. nuclear hazards, Solid waste Management, Relevance of environmental ethics for environmental protection, Social Issues and the Environment: From Unsustainable to Sustainable development, Urban problems related to energy, Water conservation, Impact of Climate change, Innovative ideas for creating public environmental awareness.	<b>03</b>

## **Vision and Mission of Computer Department**

### **Department Vision**

To be a premier Computer Engineering program by achieving excellence in Academics and Research for creating globally competent and ethical professionals.

### **Department Mission**

M1: To develop technologically competent and self-sustained professionals through contemporary curriculum.

M2: To nurture innovative thinking and collaborative research, making a positive impact on society.

M3: To provide state-of-the art computing environment and learning opportunities through Center of Excellence.

M4: To foster leadership skills and ethics with holistic development.
